Introduction

Template defines the appearance of the website.

Docfx ships several built-in templates. We recommend using the modern template that matches the look and feel of this site. It supports dark mode, more features, rich customization options and.

Use the modern template by setting the `template` property to `["default", "modern"]`:

```
{
  "build": {
    "template": [
      "default",
      "modern"
    ]
  }
}
```

Additional templates are available at the [Template Gallery](#).

Template Metadata

The easiest way of customizing the the appearance of pages is using [metadata](#). Here is a list of predefined metadata:

| Modern Template | | Default Template | |
|------------------------------|--------|--|--|
| Name | Type | Description | |
| <code>_appTitle</code> | string | A string append to every page title. | |
| <code>_appName</code> | string | The name of the site displayed after logo. | |
| <code>_appFooter</code> | string | The footer HTML. | |
| <code>_appLogoPath</code> | string | Path to the app logo. | |
| <code>_appLogoUrl</code> | string | URL for the app logo. | |
| <code>_appFaviconPath</code> | string | Favicon URL path. | |
| <code>_enableSearch</code> | bool | Whether to show the search box. | |
| <code>_noindex</code> | bool | Whether to include in search results | |

| Name | Type | Description |
|------------------------------------|--------|---|
| <code>_disableContribution</code> | bool | Whether to show the <i>"Edit this page"</i> button. |
| <code>_gitContribute</code> | object | Defines the <code>repo</code> and <code>branch</code> property of git links. |
| <code>_gitUrlPattern</code> | string | URL pattern of git links. |
| <code>_disableNewTab</code> | bool | Whether to render external link indicator icons and open external links in a new tab. |
| <code>_disableNavbar</code> | bool | Whether to show the navigation bar. |
| <code>_disableBreadcrumb</code> | bool | Whether to show the breadcrumb. |
| <code>_disableToc</code> | bool | Whether to show the TOC. |
| <code>_disableAffix</code> | bool | Whether to show the right rail. |
| <code>_disableNextArticle</code> | bool | Whether to show the previous and next article link. |
| <code>_disableTocFilter</code> | bool | Whether to show the table of content filter box. |
| <code>_googleAnalyticsTagId</code> | string | Enables Google Analytics web traffic analysis. |
| <code>_lang</code> | string | Primary language of the page. If unset, the <code><html></code> tag will not have <code>lang</code> property. |
| <code>_layout</code> | string | Determines the layout of the page. Supported values are <code>landing</code> and <code>chromeless</code> . |

TIP

Docfx produces the right git links for major CI pipelines including [GitHub](#), [GitLab](#), [Azure Pipelines](#), [AppVeyor](#), [TeamCity](#), [Jenkins](#). `_gitContribute` and `_gitUrlPattern` are optional on these platforms.

Custom Template

To build your own template, create a new folder and add it to `template` config in `docfx.json`:

```
{
  "build": {
    "template": [
      "default",
      "modern",
      "my-template" // <-- Path to custom template
    ]
  }
}
```

Add your custom CSS file to `my-template/public/main.css` to customize colors, show and hide elements, etc. This is an example stylesheet that adjust the font size of article headers.

```
/* file: my-template/public/main.css */
article h1 {
  font-size: 40px;
}
```

You can also use [CSS variables](#) to adjust the templates. There are many predefined CSS variables in [Bootstrap](#) that can be used to customize the site:

```
/* file: my-template/public/main.css */
body {
  --bs-link-color-rgb: 66, 184, 131 !important;
  --bs-link-hover-color-rgb: 64, 180, 128 !important;
}
```

The `my-template/public/main.js` file is the entry JavaScript file to customize docfx site behaviors. This is a basic setup that changes the default color mode to dark and adds some icon links in the header:

```
/* file: my-template/public/main.js */
export default {
  defaultTheme: 'dark',
  iconLinks: [
    {
      icon: 'github',
      href: 'https://github.com/dotnet/docfx',
      title: 'GitHub'
    }
  ]
}
```

```

    },
    {
      icon: 'twitter',
      href: 'https://twitter.com',
      title: 'Twitter'
    }
  ]
}

```

You can add custom startup scripts in `main.js` using the `start` option:

```

export default {
  start: () => {
    // Startup script goes here
  },
}

```

You can also configure syntax highlighting options using the `configureHljs` option:

```

export default {
  configureHljs: (hljs) => {
    // Customize highlight.js here
  },
}

```

See [this example](#) on how to enable `bicep` syntax highlighting.

More customization options are available in the [docfx options object](#).

Getting Started

Licence

GNU GENERAL PUBLIC LICENSE V3

| 29 June 2007

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

Terms and Conditions

0. Definitions

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code

The "source code" for a work means the preferred form of the work for making modifications to it.

"Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no

permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated

place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) **Disclaiming** warranty **or** limiting liability **differently** from the terms of sections 15 **and** 16 of this License; **or**

b) Requiring preservation of specified reasonable legal notices **or** author attributions in that material **or** in the Appropriate Legal Notices **displayed by** works containing it; **or**

c) Prohibiting misrepresentation of the **origin** of that material, **or** requiring that modified versions of such material **be** marked in reasonable ways as **different** from the **original** version; **or**

d) Limiting the use for publicity purposes of names of licensors **or** authors of the material; **or**

e) Declining to grant rights under trademark law for use of some trade names, trademarks, **or** service marks; **or**

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the

Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a [copy](#) of the GNU General Public License along with this [program](#). If not, see [<https://www.gnu.org/licenses/>](https://www.gnu.org/licenses/).

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

Copyright (C) This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'`. This is free software, and you are welcome to redistribute it under certain conditions; type `show c'` for details.

The hypothetical commands `show w'` and `show c'` should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <https://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <https://www.gnu.org/licenses/why-not-lgpl.html>.

Contributing to Alis

Thank you for your interest in contributing to Alis! Your contributions help make this project better for everyone. Whether you're fixing bugs, adding new features, improving documentation, or helping out in any other way, we're excited to have you on board.

Code of Conduct

By participating in this project, you agree to abide by the [Code of Conduct](#). Please read it to understand the expectations we have for all contributors.

How to Contribute

Reporting Bugs

If you find a bug in the project, please open an issue on our [GitHub Issues](#) page. When reporting a bug, include:

- A clear and descriptive title.
- Steps to reproduce the issue.
- Expected and actual results.
- Any relevant screenshots, logs, or other information.

Suggesting Features

We welcome feature requests! To suggest a new feature, please open an issue on our [GitHub Issues](#) page. Provide a detailed explanation of the feature, its potential benefits, and any examples or mockups that might help illustrate your idea.

Submitting Changes

1. Fork the repository.
2. Create a new branch from `main` (e.g., `feature/awesome-feature`).
3. Make your changes in the new branch.
4. Ensure your code follows our [Coding Standards](#) and includes tests if applicable.
5. Commit your changes with a descriptive commit message.
6. Push your changes to your fork.
7. Open a pull request to the `main` branch of the original repository.

Please ensure that your pull request:

- Describes the change you are making.
- References any related issues.
- Includes relevant tests and documentation updates.

Development Process

Setting Up the Environment

To set up your development environment, follow these steps:

1. Clone the repository: `git clone https://github.com/pabllopf/Alis.git`
2. Navigate to the project directory: `cd alis`
3. Install dependencies: `dotnet restore`

Building the Project

Instructions for building the project will vary depending on the technology stack. Ensure you have the necessary tools installed, such as Node.js, Python, etc.

```
dotnet build alis.sln
```

Running Tests

Run the project's tests to ensure your changes don't break anything:

```
dotnet test alis.sln
```

Style Guides

Coding Standards

Adhere to the following coding standards to maintain code quality and readability:

- Follow the language-specific style guides (e.g., PEP 8 for Python, ESLint for JavaScript).
- Write clear, concise, and well-documented code.
- Include comments where necessary to explain complex logic.

Commit Messages

Write meaningful commit messages to make the history easier to understand:

- Use the present tense ("Add feature" not "Added feature").
- Use the imperative mood ("Move cursor to..." not "Moves cursor to...").
- Include a brief summary of the changes made.
- Reference issues and pull requests when applicable (e.g., [Fixes #123](#)).

Acknowledgments

We appreciate your contributions! If your pull request is merged, you will be listed as a contributor in the project's [Contributors](#) section.

Thank you for helping make Alis better for everyone!

Code of Conduct

Our Pledge

In the interest of fostering an open and welcoming environment, we as contributors and maintainers pledge to making participation in our project and our community a harassment-free experience for everyone, regardless of age, body size, disability, ethnicity, sex characteristics, gender identity and expression, level of experience, education, socio-economic status, nationality, personal appearance, race, religion, or sexual identity and orientation. 

Our Standards

Examples of behavior that contributes to creating a positive environment include:

- Using welcoming and inclusive language   
- Being respectful of differing viewpoints and experiences   
- Gracefully accepting constructive criticism   
- Focusing on what is best for the community   
- Showing empathy towards other community members   

Examples of unacceptable behavior by participants include:

- The use of sexualized language or imagery and unwelcome sexual attention or advances   
- Trolling, insulting/derogatory comments, and personal or political attacks   
- Public or private harassment   
- Publishing others' private information, such as a physical or electronic address, without explicit permission   
- Other conduct which could reasonably be considered inappropriate in a professional setting  

Our Responsibilities

Project maintainers are responsible for clarifying the standards of acceptable behavior and are expected to take appropriate and fair corrective action in response to any instances of unacceptable behavior.

Project maintainers have the right and responsibility to remove, edit, or reject comments, commits, code, wiki edits, issues, and other contributions that are not aligned to this Code of Conduct, or to ban temporarily or permanently any contributor for other behaviors that they deem inappropriate, threatening, offensive, or harmful.   

Scope

This Code of Conduct applies both within project spaces and in public spaces when an individual is representing the project or its community. Examples of representing a project or community include

using an official project e-mail address, posting via an official social media account, or acting as an appointed representative at an online or offline event. Representation of a project may be further defined and clarified by project maintainers. 📧 🖨️ 🤝

Enforcement

Instances of abusive, harassing, or otherwise unacceptable behavior may be reported by contacting the project team. All complaints will be reviewed and investigated and will result in a response that is deemed necessary and appropriate to the circumstances. The project team is obligated to maintain confidentiality with regard to the reporter of an incident. Further details of specific enforcement policies may be posted separately. 🔍 📢

Project maintainers who do not follow or enforce the Code of Conduct in good faith may face temporary or permanent repercussions as determined by other members of the project's leadership. ⚠️ 👁️ 🔒

Security Policy

Supported Versions

The following are the compatible versions (target frameworks) of the project that are supported with security updates:

- **.NET:**

- `net5.0`, `net5.0-windows`
- `net6.0`, `net6.0-android`, `net6.0-ios`, `net6.0-maccatalyst`, `net6.0-macos`, `net6.0-tvos`, `net6.0-windows`
- `net7.0`, `net7.0-android`, `net7.0-ios`, `net7.0-maccatalyst`, `net7.0-macos`, `net7.0-tvos`, `net7.0-windows`
- `net8.0`, `net8.0-android`, `net8.0-browser`, `net8.0-ios`, `net8.0-maccatalyst`, `net8.0-macos`, `net8.0-tvos`, `net8.0-windows`

- **.NET Core:**

- `netcoreapp2.0`, `netcoreapp2.1`, `netcoreapp2.2`
- `netcoreapp3.0`, `netcoreapp3.1`

- **.NET Standard:**

- `netstandard2.0`, `netstandard2.1`

- **.NET Framework:**

- `net461`, `net462`, `net463`, `net47`, `net471`, `net472`, `net48`, `net481`

- **MonoAndroid:**

- `monoandroid`

- **MonoMac:**

- `monomac`

- **MonoTouch:**

- `monotouch`

- **Tizen:**

- `tizen40`, `tizen60`

- **Xamarin.iOS:**

- `xamarinios`

- **Xamarin.Mac:**

- `xamarinmac`

- **Xamarin.TVOS:**
 - `xamarintvos`
- **Xamarin.WatchOS:**
 - `xamarinwatchos`

Reporting a Vulnerability

If you discover a security vulnerability in this project, please follow these steps to report it:

1. **Contact Us:** Send an email to pabloperdomofalcon@gmail.com. Please include detailed information about the vulnerability, including steps to reproduce and any potential impact.
2. **Response Time:** We aim to respond to all security reports within 72 hours. We will acknowledge receipt of your report and provide you with an estimated timeline for resolution.
3. **Evaluation:** Our team will review the report and assess the severity of the vulnerability. We will then determine whether the vulnerability is valid and how it will be addressed. You will receive an update on the status of your report, whether it is accepted or declined.
4. **Disclosure:** Once a fix has been implemented and released, we will provide a detailed description of the vulnerability and the resolution in our release notes and security updates. We will also notify you directly.
5. **Responsible Disclosure:** Please do not disclose the vulnerability publicly until a fix has been released. This helps us to address the issue effectively and protect users.

Security Updates

- **Release Schedule:** Security updates are released as part of our regular release cycle. Critical fixes may be released as hotfixes outside of the regular schedule if necessary.
- **Changelog:** Detailed information about each security update, including the nature of the fix and affected components, will be documented in our changelog.

Security Practices

- **Code Review:** All code changes, especially those affecting security, are reviewed by multiple team members to ensure adherence to security best practices.
- **Testing:** We use automated and manual testing to identify vulnerabilities. Security-related tests are included in our continuous integration pipeline.
- **Dependencies:** We regularly update and audit our dependencies to address known vulnerabilities in third-party libraries.

Known Vulnerabilities

- **Disclosure:** Information about known vulnerabilities, including details on affected versions and mitigation steps, will be shared in our public issue tracker or release notes.
- **Updates:** We will provide updates on the status of known vulnerabilities and the steps we are taking to address them.

Contact

For any questions or additional information regarding our security policy, please contact us at pabloperdomofalcon@gmail.com .

Changelog

All notable changes to this project will be documented in this file.

The format is based on [Keep a Changelog](#), and this project adheres to [Semantic Versioning](#).

[v0.4.2](#) - 2024-08-13

🌟 New Features

- [679a4dd](#) - do more simple the dungeon module and introduce new items on sample generator (commit by [@pabllopf](#))

🐛 Bug Fixes

- [e46753b](#) - the tests of imgui (commit by [@pabllopf](#))

✅ Tests

- [490c544](#) - 100% test of dungeon module (commit by [@pabllopf](#))
- [9234935](#) - add new ImDrawCmdTest (commit by [@pabllopf](#))
- [6e4cf16](#) - 2% test imgui module (commit by [@pabllopf](#))
- [94de09b](#) - 250 test to imgui module (commit by [@pabllopf](#))
- [9034c18](#) - include new 30 test (commit by [@pabllopf](#))
- [5930907](#) - covert 7% imgui module (commit by [@pabllopf](#))
- [859b9e2](#) - covert 10% imgui module (commit by [@pabllopf](#))
- [a6e58cf](#) - add tests of ImGuiOPtr struct (commit by [@pabllopf](#))
- [0587f5a](#) - add new 100 test to imgui module (commit by [@pabllopf](#))
- [7f07e26](#) - fix tests of imgui (commit by [@pabllopf](#))
- [267f6d9](#) - covert 20% of imgui (commit by [@pabllopf](#))
- [1450451](#) - fix port number (commit by [@pabllopf](#))
- [efd4696](#) - fix port number (commit by [@pabllopf](#))
- [08ea249](#) - create the server on the custom ports (commit by [@pabllopf](#))
- [8385275](#) - fix GetStyle_ShouldGetStyle (commit by [@pabllopf](#))
- [a795d20](#) - pro check all platforms (commit by [@pabllopf](#))
- [d6b54e1](#) - delete ImGuiNative (commit by [@pabllopf](#))
- [498addd](#) - set 1600 test to imgui module (commit by [@pabllopf](#))
- [11ddc68](#) - add new 150 test (commit by [@pabllopf](#))
- [7fa22c6](#) - add new 300 test (commit by [@pabllopf](#))
- [e19ca1a](#) - add tests to all implot parts (commit by [@pabllopf](#))
- [e7c20d1](#) - fix igPopStyleVar tests (commit by [@pabllopf](#))
- [c994203](#) - fix v2_PopStyleVar_ThrowsDllNotFoundException (commit by [@pabllopf](#))
- [0ad8921](#) - fix cache on github actions (commit by [@pabllopf](#))

- [6a8433d](#) - run check (commit by [@pabllopf](#))
- [fec95dc](#) - fix the workflow (commit by [@pabllopf](#))
- [99dd719](#) - fix load imgui dll (commit by [@pabllopf](#))
- [85f0648](#) - fix the call cimgui (commit by [@pabllopf](#))
- [fed7512](#) - include ImGuiP5 fix (commit by [@pabllopf](#))
- [d3b8bf9](#) - pro check all versions (commit by [@pabllopf](#))

[v0.4.1](#) - 2024-07-30

🌟 New Features

- [5b60db8](#) - add new extension to create custom updaters of platforms (commit by [@pabllopf](#))
- [5e06606](#) - implement a new tiny architecture on updater module to do more flexible (commit by [@pabllopf](#))
- [ca780d1](#) - add dungeon generator (commit by [@pabllopf](#))
- [b2a9a3e](#) - create simple sample to console print the dungeon (commit by [@pabllopf](#))
- [d5c0005](#) - include simple sample of updater module (commit by [@pabllopf](#))

🐛 Bug Fixes

- [3040bd0](#) - test on windows platform (commit by [@pabllopf](#))
- [3dfc512](#) - scene load json test (commit by [@pabllopf](#))
- [37a4315](#) - include only the xunit runner into the test modules (commit by [@pabllopf](#))
- [ce866da](#) - Set custom var to introduce hight validator al methods (commit by [@pabllopf](#))

✅ Tests

- [2bc174b](#) - pro check all tests (commit by [@pabllopf](#))
- [3815e03](#) - pro fix the target frameworks (commit by [@pabllopf](#))
- [507f64b](#) - pro check the new config (commit by [@pabllopf](#))
- [028cfcb](#) - pro fix plugins folders (commit by [@pabllopf](#))
- [1537e27](#) - pro test and config (commit by [@pabllopf](#))
- [79c1f7f](#) - pro check the best option to unzip (commit by [@pabllopf](#))
- [632bf34](#) - pro fix test release mode plugins (commit by [@pabllopf](#))
- [0cf6496](#) - pro fix test of unit player (commit by [@pabllopf](#))
- [4a5252c](#) - pro check unix player (commit by [@pabllopf](#))
- [008f049](#) - pro set not parallel all tests (commit by [@pabllopf](#))
- [d54cf9f](#) - pro fix wuth delay the test play (commit by [@pabllopf](#))
- [3af7aab](#) - pro add check playing state (commit by [@pabllopf](#))

📄 Documentation Changes

- [edfc659](#) - add docs to updater module (commit by [@pabllopf](#))

Code Style Changes

- [9c86137](#) - refactor the dungeon module to reduce complex and include comments on methods (commit by [@pabllopf](#))
- [4d46158](#) - move the updater to main dir and delete github of names (commit by [@pabllopf](#))

[v0.4.0](#) - 2024-07-21

Bug Fixes

- [971eeb6](#) - build the macos apps on .dmg (commit by [@pabllopf](#))

[v0.3.9](#) - 2024-07-21

Bug Fixes

- [206fcfb](#) - names and creation of json files (commit by [@pabllopf](#))

[v0.3.8](#) - 2024-07-20

New Features

- [79a4b24](#) - create simple installer (commit by [@pabllopf](#))
- [7b3869e](#) - add icon for engine and installer (commit by [@pabllopf](#))
- [c2f4911](#) - new installer for update the engine (commit by [@pabllopf](#))
- [768e5a4](#) - include in the engine the updater (commit by [@pabllopf](#))

Bug Fixes

- [85bb63f](#) - delete useless icons and sprites from installer (commit by [@pabllopf](#))
- [48c5949](#) - the main dir of engine builds. (commit by [@pabllopf](#))

[v0.3.7](#) - 2024-07-20

New Features

- [609e694](#) - new system of dialogue (commit by [@pabllopf](#))

Bug Fixes

- [055fbc2](#) - delete unless files of engine (commit by [@pabllopf](#))
- [0c4b5e1](#) - define defaults target frameworks to build (commit by [@pabllopf](#))

Tests

- [f22855e](#) - fix some spaces (commit by [@pabllopf](#))
- [a28a25a](#) - check app testing (commit by [@pabllopf](#))

- [8d69e12](#) - pro check of all platforms (commit by [@pabllopf](#))
- [2dca569](#) - pro check all (commit by [@pabllopf](#))
- [2f94df8](#) - pro fix the elapsedTime time (commit by [@pabllopf](#))
- [e8eab55](#) - covert 100% of plugin module (commit by [@pabllopf](#))

Code Style Changes

- [589b882](#) - delete all [ExcludeFromCodeCoverage] to have real covert tests (commit by [@pabllopf](#))

[v0.3.5](#) - 2024-07-18

Bug Fixes

- [d17075f](#) - readme of nugets (commit by [@pabllopf](#))
- [ad21109](#) - reduce to -400 code smells (commit by [@pabllopf](#))

Tests

- [60b1c69](#) - add GTest (commit by [@pabllopf](#))
- [0a50e67](#) - 100% covert of math module (commit by [@pabllopf](#))

Documentation Changes

- [0ea78a1](#) - add comments to all new classes and structs (commit by [@pabllopf](#))

Code Style Changes

- [0b34dd3](#) - refactor the code to do more clean. And delete spaces and tabs of empty lines (commit by [@pabllopf](#))
- [398d5a7](#) - rename all names of public properties of math module with the correct format. (commit by [@pabllopf](#))

[v0.3.4](#) - 2024-07-17

Bug Fixes

- [b06c10f](#) - target framework, to include more frameworks. (commit by [@pabllopf](#))
- [5b372ac](#) - PackageReleaseNotes (commit by [@pabllopf](#))
- [fbdaa6c](#) - add new config to csprojs to include a readme and new targets (commit by [@pabllopf](#))
- [98a67e6](#) - when compile to test the apps modules (commit by [@pabllopf](#))

Code Style Changes

- [3440cc4](#) - move all config of .csproj to custom file in configs files to dont need restar sln every time. (commit by [@pabllopf](#))

[v0.3.3](#) - 2024-07-17

🌟 New Features

- [8ab5c8f](#) - new publish with all engine builds (commit by [@pabllopf](#))

[v0.3.2](#) - 2024-07-17

🌟 New Features

- [f37f3a8](#) - icons on engine (commit by [@pabllopf](#))
- [f407519](#) - include the solid, regular and light fonts to custom. (commit by [@pabllopf](#))
- [2d4bf95](#) - add game demo on engine (commit by [@pabllopf](#))
- [2b0a4c4](#) - render basic on engine (commit by [@pabllopf](#))
- [560350e](#) - close window when click red button (commit by [@pabllopf](#))
- [a8b1313](#) - add new audioPlayerWindow and fix the imgui.begin (commit by [@pabllopf](#))
- [d292c9e](#) - add AssetsWindow to engine (commit by [@pabllopf](#))
- [e6edd95](#) - add new IRuntime (commit by [@pabllopf](#))
- [680706c](#) - add preview render (commit by [@pabllopf](#))

🐛 Bug Fixes

- [82b5de5](#) - delegate error when is seriacing (commit by [@pabllopf](#))
- [58324ba](#) - move sample of game to the custom demo. (commit by [@pabllopf](#))
- [44cea4c](#) - independent render context for game sample (commit by [@pabllopf](#))
- [c23ad6a](#) - window dll sld2 (commit by [@pabllopf](#))

✅ Tests

- [1956a54](#) - pro check actual state (commit by [@pabllopf](#))
- [1684600](#) - pro check pro test (commit by [@pabllopf](#))

🎨 Code Style Changes

- [18d1adf](#) - move the sample to the scene view (commit by [@pabllopf](#))

[v0.3.1](#) - 2024-07-07

🌟 New Features

- [190fcd7](#) - add simple ImGuiDemo (commit by [@pabllopf](#))

🐛 Bug Fixes

- [afdce39](#) - rename parameter 'item' to 'node' to match the interface declaration (commit by [@pabllopf](#))

- [cbb8fa0](#) - sln csprojs (commit by [@pabllopf](#))
- [e49be52](#) - names of interfaces (commit by [@pabllopf](#))
- [9a570d7](#) - the name ImNodesAttribute (commit by [@pabllopf](#))
- [4f1d0ab](#) - the ImGuiStyle vars (commit by [@pabllopf](#))
- [48e23d9](#) - Make this field ' private' and encapsulate it in a 'public' property. (commit by [@pabllopf](#))
- [2ebf0e8](#) - Make this field ' private' and encapsulate it in a 'public' property. (commit by [@pabllopf](#))
- [fb4ecf4](#) - dock focus when click background (commit by [@pabllopf](#))
- [7c49c92](#) - mouse zoom (commit by [@pabllopf](#))
- [f2aaf8a](#) - ImGuiIsOver_Nil (commit by [@pabllopf](#))

✓ Tests

- [c8a377e](#) - fix the test with properties. (commit by [@pabllopf](#))

Documentation Changes

- [5ca62d6](#) - add descriptions to methods (commit by [@pabllopf](#))

Code Style Changes

- [286cf6c](#) - refactor the main sln to update spaces, tabs, and comments (commit by [@pabllopf](#))

[v0.3.0](#) - 2024-07-06

Bug Fixes

- [b9fc4a0](#) - delete vars and covert 100% transform struct (commit by [@pabllopf](#))
- [10a01bf](#) - format ImFontAtlasPtr (commit by [@pabllopf](#))
- [14b16c5](#) - delete RangeAccessor (commit by [@pabllopf](#))
- [513cd28](#) - Use the return value of method 'Add'. (commit by [@pabllopf](#))
- [c15abb4](#) - 18 issues of float (commit by [@pabllopf](#))

✓ Tests

- [3169f20](#) - covert 50% HighSpeedPriorityQueue (commit by [@pabllopf](#))
- [d934b1f](#) - create empty tests of PathGenerator (commit by [@pabllopf](#))
- [bb480a5](#) - covert 100% Profile module (commit by [@pabllopf](#))
- [c7c40e1](#) - create empty test of OpenGL (commit by [@pabllopf](#))
- [29ad5a2](#) - check new config sonarcloud (commit by [@pabllopf](#))

[v0.2.9](#) - 2024-07-03

New Features

- [174df27](#) - divide in 21 parts the ImPlot (commit by [@pabllopf](#))
- [1322e50](#) - divide on 7 parts the imgui (commit by [@pabllopf](#))
- [fd0d08b](#) - splir imgui to 7 parts (commit by [@pabllopf](#))

Bug Fixes

- [387dfc7](#) - DeathZone sample (commit by [@pabllopf](#))
- [a1fa53c](#) - samples of the paths (commit by [@pabllopf](#))
- [633da04](#) - 4 bugs of sonarcloud (commit by [@pabllopf](#))
- [43db357](#) - delete unsafe code of Vector4* (commit by [@pabllopf](#))
- [e41d131](#) - delete unsafe code of ImVector (commit by [@pabllopf](#))
- [a96bbd5](#) - delete unsafe code from RangePtrAccessor (commit by [@pabllopf](#))
- [39c2b94](#) - delete ImPtrVector (commit by [@pabllopf](#))
- [1a010d4](#) - delete ImDrawDataPtr (commit by [@pabllopf](#))
- [14401df](#) - delete ImPlotPointPtr (commit by [@pabllopf](#))
- [5bc8ef8](#) - delete ImPlotRangePtr (commit by [@pabllopf](#))
- [ebefeb1](#) - delete ImNodesEditorContextPtr (commit by [@pabllopf](#))
- [93b1d6c](#) - delete LinkDetachWithModifierClickPtr and MultipleSelectModifierPtr (commit by [@pabllopf](#))
- [9bb7a12](#) - delete IoPtr (commit by [@pabllopf](#))
- [d6adcdd](#) - change name Guizmo and delete unsafe code (commit by [@pabllopf](#))
- [9cf0ddf](#) - delete unsafe code from EmulateThreeButtonMouse (commit by [@pabllopf](#))
- [6974c0d](#) - delete all code unsafe of ImNodes (commit by [@pabllopf](#))
- [af0552c](#) - delete unseless usings (commit by [@pabllopf](#))
- [b9daacc](#) - delete unsafe code from implot part 1 (commit by [@pabllopf](#))
- [e0f62b4](#) - ImPlotP22 (commit by [@pabllopf](#))
- [8c9d737](#) - ImPlotP13 (commit by [@pabllopf](#))
- [1060619](#) - delete all unsafe code of implot (commit by [@pabllopf](#))
- [3a4ebfe](#) - the implot values (commit by [@pabllopf](#))
- [01fc459](#) - the issues of serialize math module (commit by [@pabllopf](#))
- [d2799b1](#) - reduce all input pointers (commit by [@pabllopf](#))
- [5a785e1](#) - delete all unsafe code of sln (commit by [@pabllopf](#))

[v0.2.8](#) - 2024-06-01

New Features

- [97acd15](#) - create a simple sample to Alis.Core.Aspect.Sample (commit by [@pabllopf](#))
- [8549ed4](#) - create simple sample of aspect module (commit by [@pabllopf](#))
- [0ee9a0b](#) - add 2 new samples to the sln (commit by [@pabllopf](#))
- [ae585ba](#) - simple flip animation (commit by [@pabllopf](#))
- [931c638](#) - add simple transition to animations (commit by [@pabllopf](#))
- [d8a378a](#) - add new control player (commit by [@pabllopf](#))
- [169b9a2](#) - add simple camera system (commit by [@pabllopf](#))
- [323c986](#) - add new type of extensions core of Alis, to do a core and core extension id needed (commit by [@pabllopf](#))
- [502adde](#) - create extension to imgui (commit by [@pabllopf](#))
- [57fa14b](#) - Add simple Profiler to the framework (commit by [@pabllopf](#))
- [b9057d9](#) - optimice the modules (commit by [@pabllopf](#))
- [56f5e4e](#) - add secure vars to include more security to the framework (commit by [@pabllopf](#))

- [c1ff206](#) - delete all logger system when compile release mode (commit by [@pabllopf](#))
- [3a154d8](#) - new attribute to skip test on mode release than only need execute on mode debug (commit by [@pabllopf](#))
- [b603c1e](#) - big refactor to move plugin system to extension and do optional to install to the game engine (commit by [@pabllopf](#))
- [a1827cc](#) - new extension with path generator (commit by [@pabllopf](#))
- [4526235](#) - introduce the game context to delete the singletons of architecture (commit by [@pabllopf](#))
- [848150a](#) - add jsonignore (commit by [@pabllopf](#))
- [38f0b9a](#) - implement the save/load scene controller. (commit by [@pabllopf](#))

Bug Fixes

- [aea5018](#) - the validator method on attributes code (commit by [@pabllopf](#))
- [74bddbd](#) - NotImplementedException test (commit by [@pabllopf](#))
- [d1bc9fa](#) - the test of memory module (commit by [@pabllopf](#))
- [72562aa](#) - SYSLIB0050 (commit by [@pabllopf](#))
- [8df5567](#) - format of BlendMode (commit by [@pabllopf](#))
- [6eb3112](#) - timemanager to do synch with real time (commit by [@pabllopf](#))
- [55f5cb0](#) - frames AverageFrame to int (commit by [@pabllopf](#))
- [c562e9f](#) - size and type of files of samples (commit by [@pabllopf](#))
- [6d8904e](#) - render sprite (commit by [@pabllopf](#))
- [2fce3e6](#) - the sample of the network (commit by [@pabllopf](#))
- [331a877](#) - the cancellation token (commit by [@pabllopf](#))
- [dc7e933](#) - refactor complex of methods. (commit by [@pabllopf](#))
- [7bd3bdb](#) - the TimeSpan serialize (commit by [@pabllopf](#))
- [b5cc085](#) - the json serializer (commit by [@pabllopf](#))
- [111b4cb](#) - the AdvancingFront (commit by [@pabllopf](#))
- [e56b756](#) - delete the SimpleCombiner (commit by [@pabllopf](#))
- [08e85e4](#) - return the vertices method (commit by [@pabllopf](#))
- [ac86f53](#) - the ProcessOutstandingVertex (commit by [@pabllopf](#))
- [c6a9cb6](#) - Refactor this constructor to reduce its Cognitive Complexity from 18 to the 15 allowed. (commit by [@pabllopf](#))
- [59562f8](#) - Refactor this method to reduce its Cognitive Complexity from 17 to the 15 allowed. (commit by [@pabllopf](#))
- [e65f266](#) - RayCastHelper (commit by [@pabllopf](#))
- [259e82c](#) - the main style (commit by [@pabllopf](#))
- [8c5594e](#) - the epaxis fields (commit by [@pabllopf](#))
- [0de717b](#) - field names (commit by [@pabllopf](#))
- [35375f9](#) - names of ContactId (commit by [@pabllopf](#))
- [0c6850e](#) - the factory methods delete safely (commit by [@pabllopf](#))

- [373520a](#) - names of idispose (commit by [@pabllopf](#))
- [2e37aad](#) - names of texts (commit by [@pabllopf](#))
- [b8aa4e6](#) - names of class TimeOfImpact (commit by [@pabllopf](#))
- [6131e69](#) - names and throw new NotImplementedException(); (commit by [@pabllopf](#))
- [ff97283](#) - code duplicated (commit by [@pabllopf](#))
- [3e966e6](#) - add trace to managers (commit by [@pabllopf](#))
- [180edf2](#) - for windows encode video (commit by [@pabllopf](#))
- [096ddc7](#) - the solution path (commit by [@pabllopf](#))
- [4165980](#) - add the module of external control of video and audio. (commit by [@pabllopf](#))
- [eb0ee26](#) - the conversion of json on ffmpeg (commit by [@pabllopf](#))
- [fec9895](#) - optimize space of dlls (commit by [@pabllopf](#))
- [b9c0a87](#) - change the dlls (commit by [@pabllopf](#))
- [8b32662](#) - dll of macos on extension modules (commit by [@pabllopf](#))
- [3299aef](#) - the Regex format (commit by [@pabllopf](#))
- [2f30580](#) - LangVersion to 8 (commit by [@pabllopf](#))
- [e6b920e](#) - 0 comparation (commit by [@pabllopf](#))
- [60392fd](#) - sample extension of alis (commit by [@pabllopf](#))
- [b621bcc](#) - the resources of extensions module. (commit by [@pabllopf](#))
- [8eb0725](#) - do readonly pointers of unsafe code (commit by [@pabllopf](#))
- [e2dc816](#) - delete partial class (commit by [@pabllopf](#))
- [b16c9e3](#) - delete StbTexteditStatePtr (commit by [@pabllopf](#))
- [9454f72](#) - Alis.Core.Extension.ImGui (commit by [@pabllopf](#))
- [df14c32](#) - delete ImFontAtlasCustomRectPtr (commit by [@pabllopf](#))
- [b7555b9](#) - the extension (commit by [@pabllopf](#))
- [db2edf7](#) - delete base projects and refactor math module (commit by [@pabllopf](#))
- [489fe1f](#) - the dll (commit by [@pabllopf](#))
- [e9660ac](#) - cimgui dll on win x64 (commit by [@pabllopf](#))
- [6179108](#) - comile config (commit by [@pabllopf](#))
- [ffec233](#) - delete ptr ImDrawDataPtr (commit by [@pabllopf](#))
- [00dc232](#) - config and delete benchmark (commit by [@pabllopf](#))
- [47ce582](#) - names of dlls on zip (commit by [@pabllopf](#))
- [305edc5](#) - arm64 config (commit by [@pabllopf](#))
- [9397981](#) - dlls of encode and permissons (commit by [@pabllopf](#))
- [202d2e1](#) - sln arquitecture (commit by [@pabllopf](#))
- [581119b](#) - all dlls with names and space on disk (commit by [@pabllopf](#))
- [9f12fd9](#) - delete sensor methods and add new checks on decompress zip files (commit by [@pabllopf](#))
- [40d507a](#) - delete useless methods of graphic module (commit by [@pabllopf](#))
- [8f6af1f](#) - sdl2 ttf build (commit by [@pabllopf](#))
- [6360927](#) - delete Joystick triggers (commit by [@pabllopf](#))

- [bd3ac85](#) - api graphic tests (commit by [@pabllopf](#))
- [671053e](#) - delete useless methods and fix tests (commit by [@pabllopf](#))
- [a5a4abc](#) - Change this code to not construct the path from file name entry of an archive. (commit by [@pabllopf](#))
- [4660f65](#) - delete the attribute ExcludeFromCodeCoverage from TypeDef (commit by [@pabllopf](#))
- [d5a5f19](#) - Alis.Core.Aspect.Data.Test.Json (commit by [@pabllopf](#))
- [f889a6c](#) - the test of JsonSerializerTest (commit by [@pabllopf](#))
- [b94cbc0](#) - resources build on mode release (commit by [@pabllopf](#))
- [f1065e5](#) - restoration code (commit by [@pabllopf](#))
- [7ccca4b](#) - the path namespace (commit by [@pabllopf](#))
- [736bc56](#) - delete PolyClipError (commit by [@pabllopf](#))
- [3dda0f0](#) - delete KeyValueTypeDictionaryTest (commit by [@pabllopf](#))
- [c73b064](#) - automatic test (commit by [@pabllopf](#))
- [c0d0b30](#) - workflow (commit by [@pabllopf](#))
- [b64e25d](#) - dll not found on windows test (commit by [@pabllopf](#))
- [d99b7fc](#) - audio test on windows x64 (commit by [@pabllopf](#))
- [517afa8](#) - secuencial test of audio (commit by [@pabllopf](#))
- [b50408a](#) - unit test of play module (commit by [@pabllopf](#))
- [92c2303](#) - Make sure that using this pseudorandom number generator is safe here (commit by [@pabllopf](#))
- [24c1b9b](#) - the TargetFrameworks (commit by [@pabllopf](#))
- [5166145](#) - the 30 bugs of float compartion with 0 (commit by [@pabllopf](#))
- [b4f4ae0](#) - the target framework on samples (commit by [@pabllopf](#))
- [54bf301](#) - dont use math module of system (commit by [@pabllopf](#))
- [c2528b6](#) - 3 issues with float comparation (commit by [@pabllopf](#))
- [93b3bb1](#) - bug on init VelocityConstraints (commit by [@pabllopf](#))
- [fbe4118](#) - 2 issues of async code (commit by [@pabllopf](#))
- [3df4ff9](#) - Add a nested comment explaining why this method is empty, throw a 'NotSupportedException' or complete the implementation. (commit by [@pabllopf](#))
- [430e356](#) - samples TargetFrameworks (commit by [@pabllopf](#))
- [350ad4d](#) - delete SecureBool (commit by [@pabllopf](#))
- [dc9dc74](#) - first version of json parser (commit by [@pabllopf](#))
- [8797e2f](#) - add new JsonIgnore to context vars. (commit by [@pabllopf](#))
- [107faf8](#) - add new control to create intancies on Deserialize (commit by [@pabllopf](#))

✓ Tests

- [c92d1c4](#) - add new 20 test (commit by [@pabllopf](#))
- [fcbfcb1](#) - covert 100% memory module (commit by [@pabllopf](#))
- [a64610b](#) - covert the 100% of cases of math module (commit by [@pabllopf](#))
- [2434ed0](#) - covert 100% base module (commit by [@pabllopf](#))

- [3e3a5e3](#) - refactor the videoframe (commit by [@pabllopf](#))
- [203a29c](#) - union ImDrawChannel (commit by [@pabllopf](#))
- [af9d3ef](#) - union ImDrawCmdHeader (commit by [@pabllopf](#))
- [72638dd](#) - union ImDrawCmd (commit by [@pabllopf](#))
- [28b88bb](#) - delete useless NonVersionableAttribute (commit by [@pabllopf](#))
- [220da40](#) - refactor the spaces and tabs (commit by [@pabllopf](#))
- [14e8102](#) - refactor all the props to do more clean (commit by [@pabllopf](#))
- [3c665b3](#) - refactor the main EmbeddedResource method (commit by [@pabllopf](#))
- [bcac326](#) - self conteined on sln (commit by [@pabllopf](#))
- [b83ecd9](#) - refactor sln (commit by [@pabllopf](#))
- [ce9368a](#) - delete .md files of compilation when is release mode (commit by [@pabllopf](#))
- [7baa107](#) - delete all Console.WriteLine (commit by [@pabllopf](#))
- [0a7466d](#) - delete console print and include logger (commit by [@pabllopf](#))
- [be2b9e0](#) - delete console print and include logger (commit by [@pabllopf](#))
- [d2f12ce](#) - refactor the PointOnEdgeException (commit by [@pabllopf](#))
- [02c1cd2](#) - delete console writeline (commit by [@pabllopf](#))
- [fcf7f9f](#) - refactor the physic module to extract the path generator to extension (commit by [@pabllopf](#))
- [924de0a](#) - move tools of physic module to extension module (commit by [@pabllopf](#))
- [7ede7b3](#) - refactor the data module to do more simple (commit by [@pabllopf](#))
- [26c6485](#) - refactor internal methods of json (commit by [@pabllopf](#))
- [d0cbaf2](#) - refactor the json to to more simple Apply method (commit by [@pabllopf](#))
- [b6f0f1d](#) - do more simple InvokeCreateInstanceCallback (commit by [@pabllopf](#))
- [6edeb6c](#) - refactor the ReadDictionary (commit by [@pabllopf](#))
- [4699313](#) - refactor and do more simple ListObject (commit by [@pabllopf](#))
- [ad5f5b3](#) - refactor and simple tje json serielizer (commit by [@pabllopf](#))
- [03950c4](#) - refactor the Serialize method (commit by [@pabllopf](#))
- [407d8cd](#) - simple the GetConverter (commit by [@pabllopf](#))
- [6c0e70e](#) - refactor the sln to adjust the space and tabs (commit by [@pabllopf](#))
- [b1509db](#) - refactor spaces and tabs (commit by [@pabllopf](#))

- [0f04f46](#) - delete unless class (commit by [@pabllopf](#))
- [4b0ff9d](#) - big refactor to delete singletons (commit by [@pabllopf](#))
- [c65b4ee](#) - big refactor to do more simple Alis.Core module and create a real context game to do more flexible and delete singletons of architecture (commit by [@pabllopf](#))
- [812b0bc](#) - fix name on physic module (commit by [@pabllopf](#))
- [91c1076](#) - the refactor sln spaces and tabs (commit by [@pabllopf](#))
- [dbaef5](#) - delete FixedArray2 (commit by [@pabllopf](#))
- [333c93a](#) - delete FixedArray3 (commit by [@pabllopf](#))
- [49c812f](#) - move position to math module (commit by [@pabllopf](#))
- [42a0559](#) - delete AudioBackendType to select backend (commit by [@pabllopf](#))
- [c626430](#) - refactor the audio module and test the 50% (commit by [@pabllopf](#))

[v0.2.7](#) - 2024-02-01

🌟 New Features

- [09a11f3](#) - create the sample to time module (commit by [@pabllopf](#))
- [f04eeef](#) - new version of thread an create test and docs (commit by [@pabllopf](#))
- [36c409b](#) - add netcoreapp3.1 and netcoreapp3.0 (commit by [@pabllopf](#))

🐛 Bug Fixes

- [cd233de](#) - json files parser (commit by [@pabllopf](#))
- [466bab5](#) - change AssetPath definition (commit by [@pabllopf](#))
- [cc277d6](#) - test execution with .netcoreapp (commit by [@pabllopf](#))

✅ Tests

- [20bfab2](#) - the thread manager and add cancel token (commit by [@pabllopf](#))
- [72481b2](#) - add 5 test to assetmanager (commit by [@pabllopf](#))
- [1037f4c](#) - add 10 test to assetmanager test (commit by [@pabllopf](#))
- [ee142e7](#) - covert 100% the Threading module (commit by [@pabllopf](#))
- [3d58d90](#) - add test to color and depth color (commit by [@pabllopf](#))

📄 Documentation Changes

- [3ce17f8](#) - add documentation to class of time module (commit by [@pabllopf](#))
- [869795f](#) - update the changes of Alis.Core.Aspect.Thread module (commit by [@pabllopf](#))
- [2a5040c](#) - update the Matrix3X3 xmls (commit by [@pabllopf](#))
- [a069dea](#) - add docs for atribbute class (commit by [@pabllopf](#))
- [08e43b5](#) - add documentation to Exceptions of Memory module (commit by [@pabllopf](#))

[v0.2.6](#) - 2024-01-29

✨ New Features

- [1890dcb](#) - add net5.0 compatibility (commit by [@pabllopf](#))
- [2a0db83](#) - include a new enum to select type init of sdl2 (commit by [@pabllopf](#))
- [d8626ca](#) - add new /p: Analyze=true (commit by [@pabllopf](#))

🐛 Bug Fixes

- [f76d56b](#) - delete default value on constructor of sdlcolor (commit by [@pabllopf](#))
- [099ce30](#) - test of sdl2 methods (commit by [@pabllopf](#))
- [5a7a6df](#) - the intptr strings on p-invoke code (commit by [@pabllopf](#))
- [bbf8a22](#) - load icon the sdlcontroller (commit by [@pabllopf](#))
- [568ee1b](#) - delete the sw save bmp (commit by [@pabllopf](#))
- [4e234aa](#) - test of sdl2 test (commit by [@pabllopf](#))
- [a70b2b3](#) - some methods of mouse of sdl2 (commit by [@pabllopf](#))
- [2915e45](#) - sdl2 test with rgb colors (commit by [@pabllopf](#))
- [c9664c2](#) - the main test of sln (commit by [@pabllopf](#))
- [6174008](#) - spaces and tabs of tests (commit by [@pabllopf](#))
- [b0d8078](#) - name of atributtes (commit by [@pabllopf](#))

✅ Tests

- [ef541f9](#) - add new test for SdlVertex (commit by [@pabllopf](#))
- [a314bb6](#) - delete default test of graphic module (commit by [@pabllopf](#))
- [9345995](#) - add 20 test to sdl2 module (commit by [@pabllopf](#))
- [20b81d8](#) - add new 7 test to sdl2 main class (commit by [@pabllopf](#))
- [757d686](#) - add new test of TestNumHaptics and fix 5 tests (commit by [@pabllopf](#))
- [5972083](#) - add new 7 test to sdl2 class and delete rw methods (commit by [@pabllopf](#))
- [7651529](#) - add new 20 test to class sdl2 (commit by [@pabllopf](#))
- [ff02387](#) - 400 test of sln! (commit by [@pabllopf](#))
- [7eb5af4](#) - 445 test! (commit by [@pabllopf](#))
- [2be3945](#) - add 15 more test to sdl2 (commit by [@pabllopf](#))
- [886dd1c](#) - 600 test added to sln (commit by [@pabllopf](#))
- [f73fb41](#) - 728 test on sln (commit by [@pabllopf](#))
- [adf57c9](#) - add the sdl2 test on 4 parts (commit by [@pabllopf](#))
- [733e884](#) - add new test wexclude to pollevent (commit by [@pabllopf](#))

🎨 Code Style Changes

- [3925375](#) - reduce size of api sdl2 deleting some useless methods (commit by [@pabllopf](#))
- [9d66584](#) - reduce size api sdl2, delete 7 methods useless (commit by [@pabllopf](#))
- [b46fe16](#) - delete get GetPlatform of sdl2 because alis have the same method (commit by [@pabllopf](#))

- [4dd6a7a](#) - delete some methods of sdl2 api and include .net5.0 on pack nuget (commit by [@pabllopf](#))
- [e7e4a67](#) - delete ticks methods and delay methods of sdl2 because exits this method on c# (commit by [@pabllopf](#))
- [8c963b5](#) - remove android methos useless (commit by [@pabllopf](#))
- [a9463b2](#) - refactor name of TypePixel (commit by [@pabllopf](#))
- [ccf7b01](#) - refactor to clean sln tans and spaces (commit by [@pabllopf](#))
- [0ad64d6](#) - refactor sln to adjust spaces and tans. (commit by [@pabllopf](#))

[v0.2.5](#) - 2024-01-21

✨ New Features

- [95de5e0](#) - define the death moment on flappy bird (commit by [@pabllopf](#))
- [69875ad](#) - add new json serializer to data module with zero dependencies (commit by [@pabllopf](#))
- [f38d6a1](#) - create test reporter (commit by [@pabllopf](#))
- [dc77740](#) - add simple report to ubuntu (commit by [@pabllopf](#))
- [84acb8e](#) - add xunit.runner.json (commit by [@pabllopf](#))
- [5f098c1](#) - add xml config of sonarcloud (commit by [@pabllopf](#))
- [cce0dc5](#) - add a new form to create a wrapper (commit by [@pabllopf](#))
- [153c99c](#) - new integration with .netstandard 2.1 net6.0 net7.0 and net8.0 (commit by [@pabllopf](#))
- [7ac9be3](#) - add modules compatibility with net6.0 net7.0 and net8.0 (commit by [@pabllopf](#))

🐛 Bug Fixes

- [63c7bc6](#) - the release math import (commit by [@pabllopf](#))
- [b5da589](#) - report path (commit by [@pabllopf](#))
- [46f22a0](#) - json serializer (commit by [@pabllopf](#))
- [8b6b410](#) - the CancellationTokenSource (commit by [@pabllopf](#))
- [0ec5598](#) - Change this condition so that it does not always evaluate to 'False'. Some code paths are unreachable (commit by [@pabllopf](#))
- [4636c73](#) - Make sure that using this pseudorandom number generator is safe here. (commit by [@pabllopf](#))
- [f1f7c18](#) - the math system methods of data module (commit by [@pabllopf](#))
- [665f769](#) - scripts of macos when run with xml config files (commit by [@pabllopf](#))
- [3765981](#) - wrapper of sdl2 image (commit by [@pabllopf](#))
- [f3edceb](#) - methods name of sdl2 (commit by [@pabllopf](#))
- [e376899](#) - the spaces and tabs of all code (commit by [@pabllopf](#))
- [b276f05](#) - dlls of platforms (commit by [@pabllopf](#))
- [29f1d77](#) - dlls of macos (commit by [@pabllopf](#))
- [b3d6076](#) - dlls of macos system (commit by [@pabllopf](#))
- [e919a98](#) - the linux sdl ttf and image (commit by [@pabllopf](#))

- [d096734](#) - trim fixed the params (commit by [@pabllopf](#))
- [ff33de8](#) - the dir output to extract the dlls (commit by [@pabllopf](#))
- [473f292](#) - the test of ttf (commit by [@pabllopf](#))
- [d5fe406](#) - test of InternalSizeUnicode (commit by [@pabllopf](#))
- [11b701c](#) - the test of wasinit method (commit by [@pabllopf](#))
- [83f9b69](#) - version of xunit (commit by [@pabllopf](#))
- [c9ddd16](#) - the creation of sdl init (commit by [@pabllopf](#))
- [75f0296](#) - all unit test of ttf on windows 11 (commit by [@pabllopf](#))
- [8c8de36](#) - delete linkedversion method because is useless (commit by [@pabllopf](#))
- [3b66bc9](#) - detect when sdl_image load (commit by [@pabllopf](#))
- [77f26d1](#) - image version (commit by [@pabllopf](#))
- [9b29226](#) - linux x64 libs (commit by [@pabllopf](#))
- [ae02f78](#) - dlls sdl2image (commit by [@pabllopf](#))
- [f14d4d6](#) - init sdl2image (commit by [@pabllopf](#))
- [c3aaea2](#) - name sld2 image dlls (commit by [@pabllopf](#))
- [5e8094b](#) - delete sdl_image because is not posible use in minimal api. A lot of dependencies that need to to istall. (commit by [@pabllopf](#))
- [d7fb825](#) - trim the error when is the mode release (commit by [@pabllopf](#))
- [820993d](#) - game samples (commit by [@pabllopf](#))
- [6f5880e](#) - add the plugin assets to git (commit by [@pabllopf](#))
- [9d6ceda](#) - trim config (commit by [@pabllopf](#))
- [e89aba8](#) - dir to extract the dlls (commit by [@pabllopf](#))
- [20168f5](#) - pack system and include extra runtimes (commit by [@pabllopf](#))

✓ Tests

- [717cdca](#) - covert 100% NativeSdlTtf (commit by [@pabllopf](#))
- [29b84ae](#) - TtfLinkedVersion (commit by [@pabllopf](#))
- [95090f5](#) - OpenFontIndex_NoExceptionThrown (commit by [@pabllopf](#))
- [7bed0c9](#) - add new 7 new test (commit by [@pabllopf](#))
- [1be7ee1](#) - covert all test of ttf module of font graphic module (commit by [@pabllopf](#))
- [2a81da1](#) - delete some methods of sdl2 and sdl2ttf (commit by [@pabllopf](#))
- [2e4671b](#) - add new test Test_GetVersion (commit by [@pabllopf](#))
- [b9112fd](#) - add load image test (commit by [@pabllopf](#))
- [6bb7f2c](#) - add new test loadrw (commit by [@pabllopf](#))
- [6f38ab2](#) - add new test Test_LoadTypedRw (commit by [@pabllopf](#))

🎨 Code Style Changes

- [5159222](#) - change the format of file name header of severals files (commit by [@pabllopf](#))
- [e52334b](#) - delete imgui native partial class and introduce , EntryPoint = to methods. (commit by [@pabllopf](#))

- [4d0e301](#) - refactor the name of sdl to sdl2 (commit by [@pabllopf](#))
- [68ef51d](#) - refactor the sdl2image lib to include new nativecode call. (commit by [@pabllopf](#))
- [a4073aa](#) - delete utf8manager to do more simple all. (commit by [@pabllopf](#))
- [00da05a](#) - refactor sdl ttf files to include better wrappers (commit by [@pabllopf](#))
- [a801768](#) - add to sdl [return: NotNull] [MethodImpl(MethodImplOptions.AggressiveInlining)] (commit by [@pabllopf](#))
- [6023669](#) - refactor the sdl native code to include all wrappers (commit by [@pabllopf](#))
- [7bd9837](#) - refactor the name of sdl native (commit by [@pabllopf](#))
- [b326446](#) - delete the native sdl SDL_RenderGeometryRaw (commit by [@pabllopf](#))
- [dc14f7b](#) - delete methods with more than 7 parameters (commit by [@pabllopf](#))
- [770c86f](#) - delete CreateRgbSurfaceFrom (commit by [@pabllopf](#))
- [6a02e36](#) - the style of sdl2 format (commit by [@pabllopf](#))
- [09730b8](#) - refactor the name of some structs and var on sdl2 (commit by [@pabllopf](#))
- [35acfcc](#) - refactor the names of structs (commit by [@pabllopf](#))
- [f4b10ca](#) - refactor the names of sdl2 key maps (commit by [@pabllopf](#))
- [7fb4e1e](#) - refactor the names of structs and classes (commit by [@pabllopf](#))
- [4b8fd01](#) - add logs to test (commit by [@pabllopf](#))
- [b46c972](#) - optimize spaces on files (commit by [@pabllopf](#))
- [3b9867b](#) - delete some class of physic module to do more simple and refactor to quito tuples and use custom class. (commit by [@pabllopf](#))

[v0.2.4](#) - 2024-01-02

✨ New Features

- [ef57c8f](#) - new method on managers to "calculate" things (commit by [@pabllopf](#))
- [5684521](#) - add class diagrams for modules (commit by [@pabllopf](#))
- [c72d5bc](#) - add new clock, time manager and default configuration of Time module. (commit by [@pabllopf](#))
- [866e9dd](#) - add new word "add" to language (commit by [@pabllopf](#))
- [11b52af](#) - add new word "Ai" to language (commit by [@pabllopf](#))
- [bac65a2](#) - add new word "Cloud" to language (commit by [@pabllopf](#))
- [9c1a51d](#) - add new word "Input" to language (commit by [@pabllopf](#))
- [35266dc](#) - add new word "License" to language (commit by [@pabllopf](#))
- [aa17756](#) - add new word "Network" to language (commit by [@pabllopf](#))
- [3e18598](#) - add new word "Profile" to language (commit by [@pabllopf](#))
- [dd6788e](#) - add new word "Plugin" to language (commit by [@pabllopf](#))
- [aec557e](#) - add new word "Scene" to language (commit by [@pabllopf](#))
- [43934ca](#) - add new word "Script" to language (commit by [@pabllopf](#))
- [3b7943e](#) - add new word "Store" to language (commit by [@pabllopf](#))
- [0637768](#) - add new word "Version" to language (commit by [@pabllopf](#))

- [bda8e2d](#) - add new word "World" to language (commit by [@pabllopf](#))
- [c37d128](#) - add new core integration with the new module "Ecs" (commit by [@pabllopf](#))
- [ed76833](#) - version 1.0 of Translation module with simple sample. (commit by [@pabllopf](#))
- [f3ef811](#) - define the global.json (commit by [@pabllopf](#))
- [91cc935](#) - define default test to all modules (commit by [@pabllopf](#))
- [2198102](#) - include the basic logic on the physic manager. (commit by [@pabllopf](#))
- [98a717e](#) - add new sample game flappy bird, create new custom render textures and create new loader of assets (commit by [@pabllopf](#))
- [2a30f1d](#) - add the soundtrack to the new sample game flappy bird. (commit by [@pabllopf](#))
- [1c8f945](#) - add the floor animation to game sample flappy bird (commit by [@pabllopf](#))
- [bae725b](#) - add the main menu test, the counter and the bird textures. (commit by [@pabllopf](#))
- [790c308](#) - add animation to the bird (commit by [@pabllopf](#))
- [be796cd](#) - implement the basic change of scenes. (commit by [@pabllopf](#))
- [b5884f7](#) - add new sound when fly the bird. (commit by [@pabllopf](#))
- [1198075](#) - add new icon and controller to pong game (commit by [@pabllopf](#))
- [8e6cec5](#) - implement simple counter on flappy bird (commit by [@pabllopf](#))
- [edeb99a](#) - add new simple font render and create new collisions and refactor code of flappy bird sample (commit by [@pabllopf](#))
- [c80bda9](#) - add the collision and trigger methods to component base object (commit by [@pabllopf](#))
- [29500c0](#) - delete sprites of flappy bird (commit by [@pabllopf](#))
- [074a6aa](#) - move licence file of alis to output dir when compile a game. (commit by [@pabllopf](#))
- [99dcb95](#) - add new pipeline controller to flappy bird (commit by [@pabllopf](#))
- [013e25f](#) - add new collision detection methods to component of alis. (commit by [@pabllopf](#))
- [eebac11](#) - add new default black windows sample game (commit by [@pabllopf](#))
- [9cfc570](#) - update the build script to test compilation (commit by [@pabllopf](#))

Bug Fixes

- [d507c99](#) - deltatime of collisions and windows (commit by [@pabllopf](#))
- [fdeb840](#) - windows loop with automatic backend (commit by [@pabllopf](#))
- [b880928](#) - delete the opengl backend of linux and set automatic detection. (commit by [@pabllopf](#))
- [48523e4](#) - don't include on compilation the *.md and *.cd files. (commit by [@pabllopf](#))
- [95df01d](#) - implement the Input and Graphic managers and optimice with new builder. (commit by [@pabllopf](#))
- [7533e9e](#) - the transform position of component (commit by [@pabllopf](#))
- [1748b9a](#) - include the engine to the sln (commit by [@pabllopf](#))
- [dec3c60](#) - delete true config on debug mode (commit by [@pabllopf](#))
- [545ad32](#) - the Assert.Equal("<7, 8>", result); test (commit by [@pabllopf](#))

- [df5ce1e](#) - delete public readonly override string ToString() => ToString("G", CultureInfo.CurrentCulture); (commit by [@pabllopf](#))
- [2859247](#) - the target trim (commit by [@pabllopf](#))
- [e948a7c](#) - auto trim detection (commit by [@pabllopf](#))
- [ab884b5](#) - the space of videogame (commit by [@pabllopf](#))
- [1b10c02](#) - the Path combine (commit by [@pabllopf](#))
- [fa15fb2](#) - 3 bugs of Dispose when it is no longer needed. (commit by [@pabllopf](#))
- [e8147d7](#) - trim error (commit by [@pabllopf](#))
- [d14aec9](#) - trim error checker (commit by [@pabllopf](#))
- [1359743](#) - workflow (commit by [@pabllopf](#))
- [6a4b161](#) - the Box2d body ' vibrates' when it is in contact. (commit by [@pabllopf](#))
- [a8d83e8](#) - trim error (commit by [@pabllopf](#))
- [2556506](#) - soundtrack when start the game of flappy bird (commit by [@pabllopf](#))
- [9d1a15e](#) - the name file on editor template for rider (commit by [@pabllopf](#))
- [526a1e7](#) - the comments on windows 10 and optimice input controller. (commit by [@pabllopf](#))
- [de27816](#) - audio crash when try to play a lot of sound at the same time. (commit by [@pabllopf](#))
- [95efc74](#) - main theme of the sample (commit by [@pabllopf](#))
- [a5fee4a](#) - set red color to default mode of pong game (commit by [@pabllopf](#))
- [b17599b](#) - name of default build for desktops (commit by [@pabllopf](#))

✓ Tests

- [aa4f762](#) - add new GameTests to Alis.Core and Alis.Core.Ecs modules. (commit by [@pabllopf](#))
- [0551bc9](#) - simple test to check uncover test (commit by [@pabllopf](#))
- [6626745](#) - covert 100% of test the logger module. (commit by [@pabllopf](#))
- [4a770fc](#) - cover the 100% of tests on the namespace Alis.Core.Aspect.Time (commit by [@pabllopf](#))
- [e64a902](#) - add simple tests to memory module. (commit by [@pabllopf](#))
- [e32a349](#) - cover 100% of namespace Alis.Core.Aspect.Translation (commit by [@pabllopf](#))
- [5a59cdb](#) - cover 100% with test the namespace Alis.Core.Aspect.Data (commit by [@pabllopf](#))
- [b54d1e6](#) - cover 100% of vector2 class (commit by [@pabllopf](#))
- [a2ced08](#) - fix the asset manager tests. (commit by [@pabllopf](#))

Build System

- [d8f6fa4](#) - **deps:** bump actions/setup-java from 3 to 4 (commit by [@dependabot\[bot\]](#))
- [1dc0518](#) - **deps:** bump actions/stale from 8 to 9 (commit by [@dependabot\[bot\]](#))

Documentation Changes

- [0ba5632](#) - change Visible to false on docs folder (commit by [@pabllopf](#))
- [bde1c8c](#) - add new ESC.md file to document the module. (commit by [@pabllopf](#))

- [a1bd2e4](#) - define and write the objectives to develop the Alis.Core.Script module. (commit by [@pabllopf](#))
- [e4204d6](#) - define and write the Alis.Core.Store module (commit by [@pabllopf](#))
- [a895f16](#) - add new alis.md file and alis.cd diagram class (commit by [@pabllopf](#))
- [6d6d0cf](#) - copy by default a simple .md with licence (commit by [@pabllopf](#))

Code Style Changes

- [2c8c6bb](#) - set default value to logger details: LogLevel = Info and DetailLevel = Full (commit by [@pabllopf](#))
- [39acf7c](#) - change struct to class transform entity. (commit by [@pabllopf](#))
- [66e525f](#) - change namespace of math aspect to adjust to the new directories. (commit by [@pabllopf](#))
- [06d2877](#) - delete empty static constructor of AssetManager (commit by [@pabllopf](#))
- [c79c576](#) - adjust the sample to the new core. (commit by [@pabllopf](#))
- [abaaab3](#) - delete all dependencies with SFML and change File:Utf8Manager.cs to namespace Alis.Core.Graphic.SDL (commit by [@pabllopf](#))
- [bb83205](#) - move class and exceptions to the namespace Alis.Core.Physic.Exceptions and delete some old class (commit by [@pabllopf](#))
- [4a79ff5](#) - include new filter for covert test ant measure the correct % of test. (commit by [@pabllopf](#))
- [10149c2](#) - delete public readonly string ToString(string format) => ToString(format, CultureInfo.CurrentCulture); (commit by [@pabllopf](#))
- [5b50275](#) - add comment on component floor animation. (commit by [@pabllopf](#))
- [ccbe69c](#) - add new comment (commit by [@pabllopf](#))
- [d70560f](#) - delete all unnecessary sound files of flappy bird sample (commit by [@pabllopf](#))

Other Changes

- [8144178](#) - delete unnecessary usings of sample. (commit by [@pabllopf](#))
- [20a2294](#) - disable engine project to check repo settings (commit by [@pabllopf](#))

[v0.2.3](#) - 2023-10-11

Code Style Changes

- [0fbb988](#) - update the Physic sample (commit by [@pabllopf](#))
- [9a36512](#) - add 100 iterations to sample of Physic and simple creation of the world to test. (commit by [@pabllopf](#))

[v0.2.2](#) - 2023-10-08

New Features

- [d81e0c0](#) - automatic detect backend render (commit by [@pabllopf](#))

Bug Fixes

- [7aa1521](#) - the physics and graphic modules to render with clock (commit by [@pabllopf](#))
- [a4b9a93](#) - collisions and velocity on osx systems (commit by [@pabllopf](#))
- [0abaabe](#) - select backend api graphic to get high performance (commit by [@pabllopf](#))
- [fc08524](#) - libs of linux arm (commit by [@pabllopf](#))

[v0.2.1](#) - 2023-10-06

Bug Fixes

- [aa5137f](#) - simple pong game collisions (commit by [@pabllopf](#))

[v0.2.0](#) - 2023-10-04

New Features

- [9c877c3](#) - run windows, macos and linux test on deploy version to master branch (commit by [@pabllopf](#))

Bug Fixes

- [453ef15](#) - add new input manager with specific controls (commit by [@pabllopf](#))
- [286bfd6](#) - the ecs system (commit by [@pabllopf](#))

[v0.1.9](#) - 2023-10-02

Bug Fixes

- [6dce735](#) - the main audio module with native backend (commit by [@pabllopf](#))

[v0.1.8](#) - 2023-10-02

New Features

- [d7ba807](#) - fix all repository and the workflows (commit by [@pabllopf](#))
- [4aa5585](#) - refactor the main publish workflow (commit by [@pabllopf](#))

Bug Fixes

- [d7bf530](#) - the version to publish (commit by [@pabllopf](#))

[v0.1.7](#)

New Features

- [47437e2](#) - new network module with cross-platform code and native full on c# (commit by [@pabllopf](#))
- [f3b4ca3](#) - add new defaults builders for main components of Alis (commit by [@pabllopf](#))
- [ea550df](#) - add id for settings of Alis (commit by [@pabllopf](#))

Bug Fixes

- [a07668d](#) - delete static reference on GraphicManager (commit by [@pabllopf](#))
- [05d81f0](#) - delete static reference on singleton on SceneManager (commit by [@pabllopf](#))
- [bf6edc5](#) - create new method for setview on GraphicManager (commit by [@pabllopf](#))
- [b73f2aa](#) - delete all module network because is only for windows. And start to creating a cross-platform network. (commit by [@pabllopf](#))
- [382ba19](#) - add static program on samples of alis (commit by [@pabllopf](#))
- [d50e485](#) - delete comments of Fixture (commit by [@pabllopf](#))
- [bff4998](#) - delete comments of RayCastHelper (commit by [@pabllopf](#))
- [a46d8f0](#) - add new type MaskKeyLengthException (commit by [@pabllopf](#))
- [713ba41](#) - extract Identification struct and IdentificationMarshalData struct (commit by [@pabllopf](#))
- [94360ee](#) - Remove the field ' localCenterB' and declare it as a local variable in the relevant methods. (commit by [@pabllopf](#))
- [d748ea6](#) - default build for IBuild (commit by [@pabllopf](#))
- [a3743d5](#) - Remove the member initializer, all constructors set an initial value for the member of SplashScreen class (commit by [@pabllopf](#))
- [4339f8e](#) - Remove the field ' videoMode' and declare it as a local variable in the relevant methods on videogame class (commit by [@pabllopf](#))
- [2812248](#) - implement default methods of TimeManager (commit by [@pabllopf](#))
- [710d2ba](#) - Use ' string.IsNullOrEmpty()' instead of comparing to empty string on AudioClipBase (commit by [@pabllopf](#))
- [e7e0ccd](#) - Use ' string.IsNullOrEmpty()' instead of comparing to empty string on AudioClipBase (commit by [@pabllopf](#))
- [a78747d](#) - delete deprecated code sfRenderTexture_create (commit by [@pabllopf](#))
- [2aea21c](#) - delete using that dont use (commit by [@pabllopf](#))
- [a19dfcf](#) - Refactor this method to reduce its Cognitive Complexity from 16 to the 15 allowed. (commit by [@pabllopf](#))
- [f0c6913](#) - Refactor this method to reduce its Cognitive Complexity from 17 to the 15 allowed. (commit by [@pabllopf](#))
- [7f30297](#) - Refactor this method to reduce its Cognitive Complexity from 36 to the 15 allowed. (commit by [@pabllopf](#))
- [a93fa01](#) - Refactor this method to reduce its Cognitive Complexity from 21 to the 15 allowed. (commit by [@pabllopf](#))
- [c5c638d](#) - Refactor this method to reduce its Cognitive Complexity from 24 to the 15 allowed of DTSweep (commit by [@pabllopf](#))

- [66e2e1a](#) - Refactor this method to reduce its Cognitive Complexity from 69 to the 15 allowed of TextureConverter (commit by [@pabllopf](#))
- [996fff7](#) - Refactor this method to reduce its Cognitive Complexity from 20 to the 15 allowed of SimplifyTools (commit by [@pabllopf](#))
- [6d6dbbe](#) - Refactor this method to reduce its Cognitive Complexity from 30 to the 15 allowed of SimpleCombiner (commit by [@pabllopf](#))
- [3ecb9d8](#) - Refactor this method to reduce its Cognitive Complexity from SimpleCombiner 57 to the 15 allowed of (commit by [@pabllopf](#))
- [f93f75b](#) - Refactor this method to reduce its Cognitive Complexity from 20 to the 15 allowed of DTSweep (commit by [@pabllopf](#))
- [20354d2](#) - Remove this unread private field '_pingPongManager' or refactor the code to use its value. (commit by [@pabllopf](#))
- [5138fb3](#) - remove _pingTask (commit by [@pabllopf](#))
- [af6c320](#) - Refactor this method to reduce its Cognitive Complexity from DynamicTree 16 to the 15 allowed of (commit by [@pabllopf](#))
- [163a482](#) - Refactor this method to reduce its Cognitive Complexity from 24 to the 15 allowed of DynamicTree (commit by [@pabllopf](#))
- [6a92f12](#) - Refactor this method to reduce its Cognitive Complexity from 16 to the 15 allowed of DynamicTree (commit by [@pabllopf](#))
- [289f51d](#) - Refactor this method to reduce its Cognitive Complexity from 36 to the 15 allowed of PolygonShape (commit by [@pabllopf](#))
- [cb91d69](#) - Either remove this useless object instantiation of class 'PingPongManager' or use it. (commit by [@pabllopf](#))
- [9a7c6ef](#) - Refactor this method to reduce its Cognitive Complexity from 16 to the 15 allowed of DistanceGJK (commit by [@pabllopf](#))
- [b77ca4c](#) - Refactor this method to reduce its Cognitive Complexity from 33 to the 15 allowed of ChainHull (commit by [@pabllopf](#))
- [b059f58](#) - Refactor this method to reduce its Cognitive Complexity from 16 to the 15 allowed of Vertices (commit by [@pabllopf](#))
- [22f5ff5](#) - Refactor this method to reduce its Cognitive Complexity from 16 to the 15 allowed of Curve (commit by [@pabllopf](#))

Documentation Changes

- [cc4bb30](#) - add default samples for modules (commit by [@pabllopf](#))
- [579ebf2](#) - delete some comments of ContactManager (commit by [@pabllopf](#))

Code Style Changes

- [1eb8b1d](#) - delete Test_To_Load_A_Shader_From_Assembly_Resources test (commit by [@pabllopf](#))
- [d20def4](#) - refactor the main class line to reduce Complexity (commit by [@pabllopf](#))
- [936ed78](#) - reduce Complexity of Triangulate (commit by [@pabllopf](#))

- [434bc66](#) - refactor Triangulator (commit by [@pabllopf](#))
- [655891e](#) - reduce size of BoundingBox (commit by [@pabllopf](#))
- [d7605f9](#) - refactor names of vars on PulleyJoint class (commit by [@pabllopf](#))
- [83364d2](#) - new Identification constructor (commit by [@pabllopf](#))
- [6d0dfb9](#) - reduce complexity FrictionJoint (commit by [@pabllopf](#))
- [fe93237](#) - delete key "this" from sln (commit by [@pabllopf](#))
- [ec10d61](#) - extract body test class of benchmarks (commit by [@pabllopf](#))
- [5ea4252](#) - add default AudioManager methods (commit by [@pabllopf](#))
- [91c9222](#) - delete useless button class (commit by [@pabllopf](#))
- [7b85f74](#) - change the name EarClip (commit by [@pabllopf](#))
- [5a57e19](#) - EarClipDecomposer names (commit by [@pabllopf](#))
- [986927d](#) - DTSweep conventions names (commit by [@pabllopf](#))
- [040b215](#) - name conventions of vars SimplifyTools (commit by [@pabllopf](#))
- [8e58e94](#) - refactor SimpleCombiner with name conventions (commit by [@pabllopf](#))
- [0cb9b09](#) - name vars of DistanceGJK (commit by [@pabllopf](#))
- [0cad471](#) - refactor names of ChainHull (commit by [@pabllopf](#))
- [64259b7](#) - refactor names of Vertices (commit by [@pabllopf](#))
- [dffe188](#) - refactor names of Curve (commit by [@pabllopf](#))

[v0.1.6](#) - 2023-09-13

Code Style Changes

- [14fd971](#) - delete .personal folder and delete temp files *(commit by [@pabllopf](#))*

[v0.1.5](#) - 2023-09-12

New Features

- [54ebf53](#) - include a new default demo to render colors, and test if run the game with only one line "VideoGame.Builder().Run();" (commit by [@pabllopf](#))

Bug Fixes

- [13b63c9](#) - delete zip compress LZMA (commit by [@pabllopf](#))
- [94df1c4](#) - windows systems (commit by [@pabllopf](#))
- [3958a96](#) - compile to windows and linux platforms. And include on windows the opengl lib (commit by [@pabllopf](#))

[v0.1.4](#) - 2023-09-11

New Features

- [df4a9e5](#) - new config to optimize the release libs (commit by [@pabllopf](#))

- [158487e](#) - new type of compress dlls (commit by [@pabllopf](#))
- [b9d3273](#) - compress all dlls of all platforms 8%. The big dll is 1.8mb (commit by [@pabllopf](#))

[v0.1.3](#) - 2023-09-10

✨ New Features

- [b94beca](#) - compress on zip native dlls (commit by [@pabllopf](#))
- [2e58475](#) - can compress on .zip all native dlls (commit by [@pabllopf](#))
- [16e96f7](#) - compress all dlls natives of graphic to less than 1mb (commit by [@pabllopf](#))
- [2f09b09](#) - reduce size of dlls of native audio than less 1mb (commit by [@pabllopf](#))

🐛 Bug Fixes

- [4eedcc2](#) - the main loop with simple game (commit by [@pabllopf](#))
- [18182b3](#) - default samples of alis games (commit by [@pabllopf](#))
- [348818d](#) - win-x64 zip files (commit by [@pabllopf](#))
- [873bdb1](#) - win-x86 zip (commit by [@pabllopf](#))
- [5f6ba7e](#) - win-arm zip (commit by [@pabllopf](#))
- [14a2470](#) - win-arm64 zip (commit by [@pabllopf](#))
- [7fd165e](#) - osx-x64 zip (commit by [@pabllopf](#))
- [c609c46](#) - linux-x64 zip (commit by [@pabllopf](#))
- [0219f03](#) - linux-x86 zip (commit by [@pabllopf](#))
- [3cf384c](#) - linux-arm zip (commit by [@pabllopf](#))
- [2d5a36f](#) - linux arm64 (commit by [@pabllopf](#))
- [8592bfb](#) - physic error when open clean project (commit by [@pabllopf](#))

[v0.1.2](#) - 2023-09-10

✨ New Features

- [f63fd4c](#) - compile depend of platform to reduce size (commit by [@pabllopf](#))
- [ec89d65](#) - include new configurations to compile tiny modules (commit by [@pabllopf](#))
- [1bfc60b](#) - tiny windows compilation 1MB Alis. (commit by [@pabllopf](#))
- [b4030ce](#) - windows arm 64 bits configuration (commit by [@pabllopf](#))
- [e12c670](#) - add new win arm64 platform. (commit by [@pabllopf](#))
- [5170720](#) - update namespace of engine module (commit by [@pabllopf](#))
- [0f27aaf](#) - auto pack with diferents platforms (commit by [@pabllopf](#))
- [439b507](#) - add new custom build for linux x64 (commit by [@pabllopf](#))
- [79eca3c](#) - add custom build for linux x86 (commit by [@pabllopf](#))
- [654fc26](#) - add custom build for linux arm64 (commit by [@pabllopf](#))
- [4fca5e2](#) - add new custom build for linux arm (commit by [@pabllopf](#))
- [811ecf7](#) - add win x86 platform (commit by [@pabllopf](#))

- [1a0b902](#) - add new platform win arm (commit by [@pabllopf](#))

Bug Fixes

- [8923729](#) - namespace of engine (commit by [@pabllopf](#))
- [451ae90](#) - windows platform optimization for x64 bits (commit by [@pabllopf](#))
- [0328fb8](#) - the engine module with new bakend with opengl and sdl2 (commit by [@pabllopf](#))
- [4d4d914](#) - the dlls audio of sdl2 on engine (commit by [@pabllopf](#))
- [04b4d76](#) - reduce the size of dlls (commit by [@pabllopf](#))
- [eeb7ad4](#) - windows x64 build (commit by [@pabllopf](#))
- [0694e4c](#) - dlls of windows arm 64 (commit by [@pabllopf](#))
- [45631a4](#) - the sfml controller (commit by [@pabllopf](#))
- [44b8a6c](#) - 3 issues of public to change internal class (commit by [@pabllopf](#))
- [7dada55](#) - add dll system to audio module (commit by [@pabllopf](#))
- [26c40a4](#) - audio module to include sfml backend (commit by [@pabllopf](#))
- [adc0b1e](#) - the osx x64 bilding of engine, audio and graphic modules (commit by [@pabllopf](#))
- [c7d0c11](#) - native engine platform osx-arm64 (commit by [@pabllopf](#))
- [5bcd1d3](#) - windows platforms (commit by [@pabllopf](#))
- [1e50177](#) - add build all platforms (commit by [@pabllopf](#))

[v0.1.1](#) - 2023-08-29

New Features

- [25ede11](#) - include native aot to compile c code (commit by [@pabllopf](#))
- [5d78486](#) - add new menus for engine (commit by [@pabllopf](#))
- [55ab483](#) - 0 dependencies with nugets (commit by [@pabllopf](#))

Bug Fixes

- [41837f3](#) - add all comments to sln (commit by [@pabllopf](#))
- [e1b4a39](#) - names of sln (commit by [@pabllopf](#))
- [0b5399c](#) - linux .so files to arm64 systems (commit by [@pabllopf](#))
- [6ad8c61](#) - delete unsafe keyword of class and change name of imguizmo (commit by [@pabllopf](#))
- [04145d9](#) - implicit conversions (commit by [@pabllopf](#))
- [6e32cb4](#) - private dlls (commit by [@pabllopf](#))
- [c2aa23b](#) - the infinite loop of gamebase (commit by [@pabllopf](#))
- [5902c65](#) - names and refactor sln (commit by [@pabllopf](#))
- [db354a7](#) - change namespace from ImGui to UI (commit by [@pabllopf](#))

Code Style Changes

- [4d44bbd](#) - change name of imnodes (commit by [@pabllopf](#))
- [8c78621](#) - change names of implot (commit by [@pabllopf](#))

- [7e85ac0](#) - change names of main class of implot (commit by [@pabllopf](#))
- [69d2317](#) - refactor implot file to change names (commit by [@pabllopf](#))

[v0.1.0](#) - 2023-08-14

🌟 New Features

- [f62f07e](#) - generate automatic binding for csfml (commit by [@pabllopf](#))
- [60fb38b](#) - add binding sdl2 (commit by [@pabllopf](#))

🐛 Bug Fixes

- [c7b47e4](#) - delete all csproj of csfml binding (commit by [@pabllopf](#))

[v0.0.9](#) - 2023-08-13

🌟 New Features

- [15058b5](#) - plugin manager and iplugin to control plugins (commit by [@pabllopf](#))
- [1b0f850](#) - new plugin module and a simple sample. (commit by [@pabllopf](#))
- [1994426](#) - the Cloud, ADS and ECS(entity component system) modules (commit by [@pabllopf](#))
- [b03743a](#) - do compatible with .netstandard 2.0 (commit by [@pabllopf](#))
- [8dccfd0](#) - add null checker on security module (commit by [@pabllopf](#))
- [cd0e7a7](#) - new proxy config (commit by [@pabllopf](#))
- [fbe189b](#) - new attributes to check not null, not empty and not zero. (commit by [@pabllopf](#))
- [4cfac7e](#) - new utf8 manager (commit by [@pabllopf](#))
- [963cefd](#) - add demo to web (commit by [@pabllopf](#))
- [7479d79](#) - add the engine to web format (commit by [@pabllopf](#))
- [314bc68](#) - integrate vulkan, opengl, metal and directx backends (commit by [@pabllopf](#))

🐛 Bug Fixes

- [d79057b](#) - move all extern code to custom class of SdlTtf (commit by [@pabllopf](#))
- [ff20713](#) - the dlls extractor (commit by [@pabllopf](#))
- [b808e9d](#) - the buf with the buffers and LayoutKind.Sequential (commit by [@pabllopf](#))
- [3f51d96](#) - random security level issue (commit by [@pabllopf](#))
- [61ce295](#) - gethashcode of matrices (commit by [@pabllopf](#))
- [4dd5da4](#) - gethashcode of vector3f (commit by [@pabllopf](#))
- [dbc1936](#) - to internal ImGuiNative (commit by [@pabllopf](#))
- [062665e](#) - 3 bugs with private and readonly class (commit by [@pabllopf](#))

Documentation Changes

- [e84d559](#) - update the main xmls folder format (commit by [@pabllopf](#))
- [918f8fb](#) - add new comments to imgui extras (commit by [@pabllopf](#))
- [ae5987f](#) - create new samples of opengl opengles vulkan dx11 and metal (commit by [@pabllopf](#))

Code Style Changes

- [7e35ed6](#) - delete comment and regions zones (commit by [@pabllopf](#))
- [1527856](#) - refactor and clean the sln (commit by [@pabllopf](#))
- [1fa2387](#) - clean and refactor sln (commit by [@pabllopf](#))
- [1875628](#) - change name of vector and matrix to include Type float (commit by [@pabllopf](#))
- [9e688f3](#) - change name of matrix with new format (commit by [@pabllopf](#))
- [a5fdc1f](#) - refactor style of math module (commit by [@pabllopf](#))
- [db48bd8](#) - big refactor of opengl module, extract the enums and delegates and change names format. (commit by [@pabllopf](#))
- [d8b4e92](#) - delete useless class (commit by [@pabllopf](#))
- [e106dc3](#) - organize the imgui folder (commit by [@pabllopf](#))
- [580b27f](#) - refactor sln to include a new namespace (commit by [@pabllopf](#))
- [02959f3](#) - refactor the ImDrawList (commit by [@pabllopf](#))
- [a6ef227](#) - wrapper sdl ttf (commit by [@pabllopf](#))
- [66ab6c9](#) - refactor namespaces to do more simple (commit by [@pabllopf](#))

[v0.0.8](#) - 2023-06-09

✨ New Features

- [f69c4b4](#) - add the gravity config to physic settings of the videogame (commit by [@pabllopf](#))
- [37beb39](#) - add the anglur velocity to the boxcollider (commit by [@pabllopf](#))
- [793b734](#) - create new directory to engine Alis.App.Engine (commit by [@pabllopf](#))
- [fbe66a7](#) - add native sdl2, imgui and opengl (commit by [@pabllopf](#))
- [247fad2](#) - add support with sdl2 and opengl (commit by [@pabllopf](#))
- [98685a2](#) - add new sln file to templates of alis (commit by [@pabllopf](#))
- [6114c95](#) - add new sln to alis.templates (commit by [@pabllopf](#))
- [6dbc2f8](#) - new module la and new module profiling (commit by [@pabllopf](#))
- [5b8b791](#) - add sdl audio backend to audio module. (commit by [@pabllopf](#))
- [55e68ab](#) - refactor sdl main class (commit by [@pabllopf](#))
- [fdd681b](#) - add new 2 controller of windows (commit by [@pabllopf](#))
- [8a5f623](#) - new module "Scripting" (commit by [@pabllopf](#))
- [b10e3b8](#) - delete all unsafe code to do more security of sdl module (commit by [@pabllopf](#))
- [bb4991f](#) - create store and translation modules (commit by [@pabllopf](#))
- [5dd931f](#) - new module "store" to include the system pay. (commit by [@pabllopf](#))

🐛 Bug Fixes

- [44df77f](#) - resources of api graphic (commit by [@pabllopf](#))
- [31c6e36](#) - the unsafe block of code (commit by [@pabllopf](#))
- [6080680](#) - delete dependencie with unsafe code (commit by [@pabllopf](#))
- [ac73804](#) - restore the sln and update the assets folder of engine. (commit by [@pabllopf](#))
- [8239997](#) - imgui module and gen code (commit by [@pabllopf](#))
- [409c7a5](#) - refactor the resources folder to equals on input graphic and audio modules (commit by [@pabllopf](#))
- [aa85caa](#) - the resources files (commit by [@pabllopf](#))
- [0e403fa](#) - sdl sintax of the main solution (commit by [@pabllopf](#))
- [1542166](#) - the dir access on windows machines (commit by [@pabllopf](#))
- [d7dd99c](#) - Unvalidated local pointer arithmetic (commit by [@pabllopf](#))
- [96915bd](#) - Unvalidated local pointer arithmetic (commit by [@pabllopf](#))
- [6556c13](#) - the last memory Unvalidated local pointer arithmetic (commit by [@pabllopf](#))
- [48d978e](#) - the ramdon generator (commit by [@pabllopf](#))
- [9dbc58e](#) - Make sure that using this pseudorandom number generator is safe here (commit by [@pabllopf](#))
- [e35987b](#) - Remove this unread private field '_seed' or refactor the code to use its value. (commit by [@pabllopf](#))
- [8e8833a](#) - Use the 'value' parameter in this property set accessor declaration (commit by [@pabllopf](#))

- [91f4d71](#) - Make sure this weak hash algorithm is not used in a sensitive context here. (commit by [@pabllopf](#))
- [43ad053](#) - the sdl audio (commit by [@pabllopf](#))
- [6b0c449](#) - the input system of alis (commit by [@pabllopf](#))
- [539d624](#) - sdl error with vars (commit by [@pabllopf](#))
- [e2ad49c](#) - separate the calls of OpenGL and context code. (commit by [@pabllopf](#))
- [1682f83](#) - the main sln names (commit by [@pabllopf](#))
- [44ec8d9](#) - 'preb' is null on at least one execution path. (commit by [@pabllopf](#))
- [efff881](#) - Add a nested comment explaining why this method is empty, throw a 'NotSupportedException' or complete the implementation. (commit by [@pabllopf](#))
- [97b7787](#) - Dispose 'tcpClient' when it is no longer needed. (commit by [@pabllopf](#))
- [ed62613](#) - Refactor Vector2F ' GetHashCode' to not reference mutable fields. (commit by [@pabllopf](#))
- [d1a04d6](#) - Vector3F Refactor ' GetHashCode' to not reference mutable fields (commit by [@pabllopf](#))
- [2258072](#) - Matrix4X4F Refactor ' GetHashCode' to not reference mutable fields. (commit by [@pabllopf](#))
- [0cc58e6](#) - RectangleF Refactor ' GetHashCode' to not reference mutable fields (commit by [@pabllopf](#))
- [4bbf783](#) - reduce size of the Sdl file (commit by [@pabllopf](#))
- [41ac71c](#) - the main sdl class (commit by [@pabllopf](#))
- [b7a6b8c](#) - delete all unsafe code of audio module (commit by [@pabllopf](#))
- [159c75f](#) - resolve some unsafe code to to safe (commit by [@pabllopf](#))
- [fb6c6b0](#) - delete some unsafe code of graphic module (commit by [@pabllopf](#))
- [73d8319](#) - the encoding text (commit by [@pabllopf](#))
- [035d853](#) - delete all unsafe code of sfml module (commit by [@pabllopf](#))
- [377002b](#) - abstract the input system (commit by [@pabllopf](#))
- [b63a640](#) - the sdl unsafe code (commit by [@pabllopf](#))
- [2b8caf2](#) - the event unsafe code (commit by [@pabllopf](#))
- [7b92206](#) - delete unsafe code SdlHapticCondition (commit by [@pabllopf](#))
- [31f7a96](#) - allow SizeConst of arrays (commit by [@pabllopf](#))
- [ad75acf](#) - delete all unsafe code of byte[] (commit by [@pabllopf](#))
- [9ddaf77](#) - the sdl unsafe code of events (commit by [@pabllopf](#))
- [1bb469e](#) - byte[] unsafe code to do with intptr (commit by [@pabllopf](#))
- [d056781](#) - the SdlSensorEvent (commit by [@pabllopf](#))
- [e1f9e9a](#) - SdlRendererInfo (commit by [@pabllopf](#))
- [d8da437](#) - delete unsafe code of opengl module (commit by [@pabllopf](#))
- [4dcc5fe](#) - the engine with imgui (commit by [@pabllopf](#))
- [6260ad6](#) - delete unsafe code of ImDrawCmd (commit by [@pabllopf](#))
- [3b7fb5b](#) - the byte sdl input event (commit by [@pabllopf](#))

- [abeb900](#) - padding byte converter (commit by [@pabllopf](#))
- [0cfa609](#) - quite unsafe code of rendered sdl imgui (commit by [@pabllopf](#))
- [bc6899d](#) - the imgui unsafe code to compile (commit by [@pabllopf](#))

✓ Tests

- [dc2dfb3](#) - new 4 test to world class (commit by [@pabllopf](#))
- [19f22be](#) - 4 new test for world class to checj add and remove of joints (commit by [@pabllopf](#))

Build System

- [72a843c](#) - **deps:** bump SkiaSharp.NativeAssets.Linux from 2.88.1 to 2.88.3 (commit by [@dependabot\[bot\]](#))
- [bb4f4ba](#) - **deps:** bump SkiaSharp.Views.Maui.Controls.Compatibility (commit by [@dependabot\[bot\]](#))
- [541b120](#) - **deps:** bump Microsoft.AspNetCore.Components.WebAssembly (commit by [@dependabot\[bot\]](#))
- [8302a07](#) - **deps:** bump Microsoft.AspNetCore.Components.WebAssembly.DevServer (commit by [@dependabot\[bot\]](#))
- [283764c](#) - **deps:** bump SkiaSharp.Views.Maui.Controls from 2.88.1 to 2.88.3 (commit by [@dependabot\[bot\]](#))
- [220af10](#) - **deps:** bump actions/dependency-review-action from 2 to 3 (commit by [@dependabot\[bot\]](#))

Code Style Changes

- [d4537d9](#) - update the sln with new scripts and configs (commit by [@pabllopf](#))
- [4ec3d77](#) - refactor all class and structs of imgui to do more clean code. (commit by [@pabllopf](#))
- [e6db497](#) - refactor to do more clean code the sln files (commit by [@pabllopf](#))
- [b451740](#) - move sln templates to folder templates (commit by [@pabllopf](#))
- [28c4dc2](#) - extract class of sdl_mixer (commit by [@pabllopf](#))
- [0699bd6](#) - Use the 'value' parameter in this property set accessor declaration (commit by [@pabllopf](#))
- [cc3ec2c](#) - refactor names of sln (commit by [@pabllopf](#))
- [5d87492](#) - refactor the main sln files (commit by [@pabllopf](#))
- [69294cf](#) - delete all bugs of Graph (commit by [@pabllopf](#))
- [0163c08](#) - refactor the main sdl2 file (commit by [@pabllopf](#))
- [1b813a8](#) - moce delegates to files (commit by [@pabllopf](#))
- [107dc2f](#) - reset sln with new modules (commit by [@pabllopf](#))

Other Changes

- [6e10cf0](#) - delete the class consolegame and soundgame (commit by [@pabllopf](#))

- [fe931d1](#) - delete matrix2x2f of physic module (commit by [@pabllopf](#))
- [de37ae2](#) - reduce langversion to 8 (commit by [@pabllopf](#))

[v0.0.7](#) - 2023-04-30

✨ New Features

- [c3086e5](#) - create a custom math entities. (commit by [@pabllopf](#))
- [69f28a1](#) - add new entities of math (commit by [@pabllopf](#))
- [288bcc1](#) - add new matrix and vector namespace of math module (commit by [@pabllopf](#))
- [b300666](#) - new input system based on sdl2 (commit by [@pabllopf](#))
- [f571eb1](#) - add buttons controller for input manager (commit by [@pabllopf](#))
- [76d2dc1](#) - include sdl2 dlls on compilation (commit by [@pabllopf](#))
- [fed11dd](#) - new sample of game " 7colors" of cards (commit by [@pabllopf](#))
- [4e8a2b5](#) - add the universe that contains worlds on physics module. (commit by [@pabllopf](#))
- [ba78c06](#) - create a workflow to update changelog (commit by [@pabllopf](#))
- [2a605cd](#) - update all scripts with the same name of the main sln (commit by [@pabllopf](#))

🐛 Bug Fixes

- [3b6fc6a](#) - delete dependencies of vector2 with system libs (commit by [@pabllopf](#))
- [79e4fd4](#) - the runtime of windows arm64 platforms (commit by [@pabllopf](#))
- [20dbdc0](#) - keyboard input when press on windows (commit by [@pabllopf](#))
- [8f5dc35](#) - keyboard input when updateEvents (commit by [@pabllopf](#))
- [de7c8b4](#) - fix the changelog file (commit by [@pabllopf](#))
- [9f0822e](#) - delete test on changelog workflow (commit by [@pabllopf](#))
- [44ca3ba](#) - delete the changelog (commit by [@pabllopf](#))
- [938b6c1](#) - test without install workloads (commit by [@pabllopf](#))
- [8578e03](#) - windows test (commit by [@pabllopf](#))
- [73ebd49](#) - delete tools of repository (commit by [@pabllopf](#))
- [3049688](#) - update sln files (commit by [@pabllopf](#))
- [ed4a5d8](#) - the for of the workflows (commit by [@pabllopf](#))
- [a7a5e02](#) - the for test (commit by [@pabllopf](#))
- [08c1c48](#) - the dev test on windows (commit by [@pabllopf](#))
- [f1630c0](#) - the main workflow of test (commit by [@pabllopf](#))

- [bb93572](#) - **deps:** bump actions/stale from 5 to 8 (commit by [@dependabot\[bot\]](#))

Documentation Changes

- [d30c821](#) - create automatic web.

Code Style Changes

- [022dfe8](#) - change the names of workflows of github (commit by [@pabllopf](#))
- [538bd9a](#) - refactor matrix and vector of numerics module. (commit by [@pabllopf](#))
- [c304839](#) - refactor main sln (commit by [@pabllopf](#))
- [a50c18d](#) - refactor name of matrix of physic module. (commit by [@pabllopf](#))
- [69360e8](#) - refactor name of transform var of position and rotation (commit by [@pabllopf](#))
- [941af60](#) - move transform and rot struct to math module (commit by [@pabllopf](#))
- [769ffee](#) - refactor name rot to rotation (commit by [@pabllopf](#))
- [02d80c6](#) - delete dependencies of numerics module on physics and create custom vectors (commit by [@pabllopf](#))

- [ed486ba](#) - refactor the main sln files (commit by [@pabllopf](#))
- [3bccc85](#) - refactor delete fixturedef of physic module (commit by [@pabllopf](#))
- [a2a06b8](#) - delete body def to simply the class (commit by [@pabllopf](#))
- [e24cfbf](#) - delete all def of physic module. (commit by [@pabllopf](#))
- [2f506d1](#) - change timeStep to time module. (commit by [@pabllopf](#))
- [31bd68e](#) - delete misc folder of physic module (commit by [@pabllopf](#))
- [cdf2ce](#) - delete cont of max value float to float.MaxValue (commit by [@pabllopf](#))
- [0e4b5b3](#) - delete regions of code (commit by [@pabllopf](#))
- [7a0d175](#) - refactor rogue sample deleting the native old libs (commit by [@pabllopf](#))
- [ab89372](#) - update the xml files (commit by [@pabllopf](#))
- [b72aa0d](#) - refactor the math helper to include on the math module (commit by [@pabllopf](#))
- [187afd5](#) - include new matrix3x3 on math module (commit by [@pabllopf](#))
- [7c314cf](#) - add the pong game to web interactive (commit by [@pabllopf](#))
- [2bd593d](#) - refactor the matrix 2x2 (commit by [@pabllopf](#))
- [8010512](#) - refactor names of sln files and vars. (commit by [@pabllopf](#))
- [3a1b17d](#) - run cleanup and refactor code (commit by [@pabllopf](#))
- [6b0f886](#) - extract class and struct of sdlmixer (commit by [@pabllopf](#))
- [132979b](#) - refactor the input module to include new class/struct of sdl lib (commit by [@pabllopf](#))
- [0bb60de](#) - end refactor of sdl to extract all class and struct in files. (commit by [@pabllopf](#))
- [a96faaf](#) - refactor the static text of files sln (commit by [@pabllopf](#))
- [9d2ba0d](#) - refactor the physic module and include new properties on world class (commit by [@pabllopf](#))
- [b4caad8](#) - create simple class world (commit by [@pabllopf](#))
- [beb2731](#) - new docs md for class world (commit by [@pabllopf](#))
- [494bb29](#) - update docs of world class (commit by [@pabllopf](#))
- [fafc89f](#) - refactor workflow of test (commit by [@pabllopf](#))
- [a46dd39](#) - refactoring the world class of physic module (commit by [@pabllopf](#))
- [d3d0bed](#) - refactor contact list to do a real list (commit by [@pabllopf](#))
- [40a5875](#) - refactor the world ClearFlags() (commit by [@pabllopf](#))
- [92ffd7b](#) - remove rest method from island (commit by [@pabllopf](#))
- [b03dfd1](#) - delete BodiesStack on world class (commit by [@pabllopf](#))
- [15af303](#) - refactor to do more simple the solve method (commit by [@pabllopf](#))
- [4a976ea](#) - create new methods on body and world to do more simple the class (commit by [@pabllopf](#))
- [90e48d1](#) - change body[] to list on island class (commit by [@pabllopf](#))
- [d7235ec](#) - change arrays to list on class island and contactsolver (commit by [@pabllopf](#))
- [270a7ad](#) - refactor style of the solution (commit by [@pabllopf](#))
- [8daf77d](#) - remove contact manager reference of island class (commit by [@pabllopf](#))
- [8d9f0af](#) - simple solve method of world class (commit by [@pabllopf](#))
- [f76def1](#) - add new method to invalidate TOI (commit by [@pabllopf](#))

- [584f8b5](#) - new method called SynchronizeBodies on island (commit by [@pabllopf](#))
- [b9dd6f8](#) - simple more toi events method of world class (commit by [@pabllopf](#))
- [e1d7c7b](#) - create new method to get mincontact (commit by [@pabllopf](#))
- [76863ad](#) - add new method called AdvanceBody on world class (commit by [@pabllopf](#))
- [6536db4](#) - create the fast iterator of list (commit by [@pabllopf](#))
- [ef0695e](#) - refactor the world class and create new method IsMinAlphaGreaterThanEpsilon (commit by [@pabllopf](#))
- [9d33957](#) - refactor the island class to include a timestep (commit by [@pabllopf](#))
- [62fc6a1](#) - delete a ref of minalpha (commit by [@pabllopf](#))
- [409cff9](#) - refactor the world class to do bodies list private. (commit by [@pabllopf](#))
- [058d59a](#) - delete the static world copies on objects. (commit by [@pabllopf](#))
- [e0937e6](#) - delete dummies test (commit by [@pabllopf](#))
- [8a6f4ef](#) - creating new figures to delete the factory methods (commit by [@pabllopf](#))

[v0.0.6](#) - 2023-04-28

🌟 New Features

- [da7b547](#) - update automatic wiki. (commit by [@pabllopf](#))
- [fdcd42](#) - change the structure of docs folder to include wiki, web, documentation, and resources folder (commit by [@pabllopf](#))
- [31dab88](#) - first version of web (commit by [@pabllopf](#))
- [e86a06e](#) - add Content Security Policy to web (commit by [@pabllopf](#))
- [bd81036](#) - add new policy (commit by [@pabllopf](#))
- [02d9697](#) - add new control of logs. (commit by [@pabllopf](#))
- [a976136](#) - add new style logs and new tool to see full logs. (commit by [@pabllopf](#))
- [f9bde5f](#) - add new template to create games with alis and 2d new render manager. (commit by [@pabllopf](#))
- [962034d](#) - add new extract method to load resources dlls (commit by [@pabllopf](#))
- [d4bcec3](#) - add template to build game on web. (commit by [@pabllopf](#))
- [7334131](#) - add .runtimes folder on sln (commit by [@pabllopf](#))
- [f5c27d6](#) - adapt the packages config for graphic modules (commit by [@pabllopf](#))
- [6ce06d5](#) - add native dlls on audio module. (commit by [@pabllopf](#))
- [b0193a3](#) - compile the alis lib with native dlls (commit by [@pabllopf](#))

- [09ad3ae](#) - the dll extract of native files (commit by [@pabllopf](#))
- [baf30a8](#) - compilation on windows for external dlls (commit by [@pabllopf](#))
- [8da2575](#) - vector 2 structure (commit by [@pabllopf](#))
- [8e6b359](#) - the automatic create test (commit by [@pabllopf](#))

✓ Tests

- [04b1a2c](#) - create 240 empty test for alis.test module (commit by [@pabllopf](#))
- [94d427c](#) - fixed default tests and start to testing videogame class (commit by [@pabllopf](#))

Documentation Changes

- [de5bc04](#) - create automatic web.
- [71811cc](#) - create automatic web.

- [1d0cb26](#) - create automatic web.
- [fe7ce86](#) - refactor the docs folder to include wiki documentation and web. (commit by [@pabllopf](#))
- [71b3441](#) - update wiki with new structure. (commit by [@pabllopf](#))
- [1970890](#) - include footer (commit by [@pabllopf](#))
- [cc601c3](#) - create automatic web.
- [b29c24e](#) - create automatic web.
- [df6ef96](#) - delete templates of web folder (commit by [@pabllopf](#))
- [2043f2f](#) - create automatic web.
- [3fbb522](#) - create donation web section (commit by [@pabllopf](#))

Code Style Changes

- [8a07408](#) - change names of docs subfolders (commit by [@pabllopf](#))
- [2a90ed6](#) - remove all cansole.writeline to inclide logs messages (commit by [@pabllopf](#))
- [312dd22](#) - refactor the sln of templates (commit by [@pabllopf](#))
- [67fd0b0](#) - refactor the tmeplate of ios to do more simple (commit by [@pabllopf](#))

Other Changes

- [a4ec78a](#) - update bookmarks of log tool. (commit by [@pabllopf](#))
- [b1d1605](#) - change the resource files (commit by [@pabllopf](#))

[v0.0.5](#) - 2022-10-23

New Features

- [607bdac](#) - add bot to check security (commit by [@pabllopf](#))
- [376596d](#) - create workflow to auto create web (commit by [@pabllopf](#))
- [94423ea](#) - Add gpg4win tool for windows (commit by [@pabllopf](#))
- [97b981d](#) - add rider for windows tool (commit by [@pabllopf](#))
- [91d3616](#) - add git tool for windows (commit by [@pabllopf](#))
- [de37217](#) - add github desktop to windows tools (commit by [@pabllopf](#))
- [ee67417](#) - add SFML (commit by [@pabllopf](#))
- [eec1de1](#) - add .net6.0 (commit by [@pabllopf](#))
- [9940504](#) - simple render cross-platform (commit by [@pabllopf](#))
- [0bbcbdd0](#) - add new script to macos os for develop on alis (commit by [@pabllopf](#))
- [c44c934](#) - add global.json with net6.0 (commit by [@pabllopf](#))
- [d6df8e7](#) - new render cross-platform (commit by [@pabllopf](#))
- [a42580c](#) - add new network socket module. (commit by [@pabllopf](#))
- [2bdbdfc](#) - add simple structure of a game on alis. (commit by [@pabllopf](#))
- [53c9fb3](#) - add installer of rider. (commit by [@pabllopf](#))
- [faa8f8d](#) - add installer github desktop (commit by [@pabllopf](#))

- [4e11c10](#) - add installer dotnet (commit by [@pabllopf](#))
- [0cd30dc](#) - add controller xbox/play module (commit by [@pabllopf](#))
- [0b0a002](#) - add test for all class of physics module (commit by [@pabllopf](#))
- [8ca2bca](#) - add empty unit test of physic module (commit by [@pabllopf](#))
- [3041698](#) - delete body linkedlist, and create simple list on world class (commit by [@pabllopf](#))
- [5a29a42](#) - add new expectation of lock world (commit by [@pabllopf](#))
- [8b8fd2e](#) - refactor to create a world more simple. (commit by [@pabllopf](#))
- [986654d](#) - create entity shape on world. (commit by [@pabllopf](#))
- [d6240c2](#) - add new entity joint to world (commit by [@pabllopf](#))
- [bce7b1c](#) - PublishTrimmed (commit by [@pabllopf](#))
- [21ae75b](#) - add new arquitecture (commit by [@pabllopf](#))
- [7ad08db](#) - create new arquitecture of alis.core (commit by [@pabllopf](#))
- [740e5d4](#) - create system and manager control (commit by [@pabllopf](#))
- [cb66212](#) - change mode on debug and release with files linked (commit by [@pabllopf](#))
- [c3e0f6f](#) - add default tools to build project (commit by [@pabllopf](#))
- [223a986](#) - add managers controller (commit by [@pabllopf](#))
- [ffcb0f0](#) - add transform for 2d games (commit by [@pabllopf](#))
- [b5f5533](#) - add new builder of scene and scenemanager (commit by [@pabllopf](#))
- [b9f5037](#) - add grapich sample and add compability with macos (commit by [@pabllopf](#))
- [0fcfcdb](#) - add graphic manager and simple windows (commit by [@pabllopf](#))
- [db15105](#) - add new audio cross platform with net standar (commit by [@pabllopf](#))
- [1ac3e4b](#) - assets folder include automatic in sample projects (commit by [@pabllopf](#))
- [aa27e61](#) - add timer control (commit by [@pabllopf](#))
- [db27866](#) - add sprite component builder and add new sample with this component (commit by [@pabllopf](#))
- [9976bec](#) - add new builder for components of alis.core (commit by [@pabllopf](#))
- [7c449e7](#) - integrate sfml modules of grapichs, audio and input (commit by [@pabllopf](#))
- [187c813](#) - new input manager (commit by [@pabllopf](#))
- [9e6b057](#) - implement the native and sfml audio module. (commit by [@pabllopf](#))
- [e58388f](#) - create audio general clases for build components (commit by [@pabllopf](#))
- [7bcf0bd](#) - add new words for api fluent and integrate the audiosource builder. (commit by [@pabllopf](#))
- [0bba00c](#) - new builders of lights and meshes (commit by [@pabllopf](#))
- [b0364a1](#) - add new builders config for audioclip and audiosource (commit by [@pabllopf](#))
- [4c614d8](#) - setting builder (commit by [@pabllopf](#))
- [0f68c8a](#) - add new simple input manager (commit by [@pabllopf](#))
- [f2d0135](#) - add animator simple (commit by [@pabllopf](#))
- [bd8eb78](#) - add player move controller with simple input (commit by [@pabllopf](#))
- [8647b7e](#) - implement managerbase clases to create interface into alis.core and alis (commit by [@pabllopf](#))

- [4b0a3be](#) - add tool to create comments (commit by [@pabllopf](#))
- [1bd6db7](#) - add animator simple builder with api fluent (commit by [@pabllopf](#))
- [1c0ef96](#) - change animation by name (commit by [@pabllopf](#))
- [ca1609f](#) - add camera (commit by [@pabllopf](#))
- [080124a](#) - add new debug (commit by [@pabllopf](#))
- [2dc87cc](#) - add icon setting on general settings. (commit by [@pabllopf](#))
- [975ab29](#) - add new setting of window and general. (commit by [@pabllopf](#))
- [26937f1](#) - resize the windows (commit by [@pabllopf](#))
- [2cce91f](#) - can change to resize and fullscreen mode with alt + enter (commit by [@pabllopf](#))
- [a9fd920](#) - add benchmark module. (commit by [@pabllopf](#))
- [fd020a8](#) - add basic templates of game with alis. (commit by [@pabllopf](#))
- [8e06194](#) - simple template cross-platform of alis. (commit by [@pabllopf](#))
- [19c3af6](#) - basic physics with dynamic/static objects. (commit by [@pabllopf](#))
- [053d5ae](#) - add simple game ping pong with physics. (commit by [@pabllopf](#))
- [9e1920c](#) - add simple player controller of ping pong game (commit by [@pabllopf](#))
- [4d1206c](#) - detect collision of two object. (commit by [@pabllopf](#))
- [f425b95](#) - add simple geometrydash controller (commit by [@pabllopf](#))
- [45e2436](#) - add simple sample of collisions (commit by [@pabllopf](#))

Bug Fixes

- [e3b827a](#) - change config file of bot dependency (commit by [@pabllopf](#))
- [926f652](#) - generation of xmls files by targetframework (commit by [@pabllopf](#))
- [3a3cbfa](#) - namespace of timestep class in the time module (commit by [@pabllopf](#))
- [9d9e787](#) - the output dir of build sln include \$configuration in the path. (commit by [@pabllopf](#))
- [59891ad](#) - netstandar 1.3 (commit by [@pabllopf](#))
- [74e5cb8](#) - add dlls for macos m1 (commit by [@pabllopf](#))
- [30583e8](#) - dont include xml files in repo (commit by [@pabllopf](#))
- [cf1fa2f](#) - give permission files sln (commit by [@pabllopf](#))
- [73ef303](#) - android manifest (commit by [@pabllopf](#))
- [3610521](#) - the tests on dev branche (commit by [@pabllopf](#))
- [5791a4a](#) - example of the desktop windows (commit by [@pabllopf](#))
- [3d043bf](#) - change names of folders and rules. (commit by [@pabllopf](#))
- [57500e0](#) - change all class to individual files on input module. (commit by [@pabllopf](#))
- [168a3a8](#) - refactor a style of code. (commit by [@pabllopf](#))
- [078fb22](#) - dependency of samples alis. (commit by [@pabllopf](#))
- [a250b64](#) - run desktop template on macos (commit by [@pabllopf](#))
- [350a674](#) - windows platform for develop (commit by [@pabllopf](#))
- [41634df](#) - add new option to see internal var on project of testing. (commit by [@pabllopf](#))
- [4e1239b](#) - namespaces of solution (commit by [@pabllopf](#))
- [8862b5c](#) - combine all partials class of collision in one class. (commit by [@pabllopf](#))

- [d81f392](#) - some name usings. (commit by [@pabllopf](#))
- [a08034a](#) - add nuget config. (commit by [@pabllopf](#))
- [8eebac8](#) - refactor world class to reduce members (commit by [@pabllopf](#))
- [155378f](#) - null reference to bodylist on world class (commit by [@pabllopf](#))
- [932eea0](#) - refactor world class to more simple (commit by [@pabllopf](#))
- [afea91d](#) - refactor world class to do more simple class (commit by [@pabllopf](#))
- [dfd2a9e](#) - delete raycast of world class. (commit by [@pabllopf](#))
- [b9d0de5](#) - change names of create/delete to add/remove of list world class (commit by [@pabllopf](#))
- [e16346d](#) - change color class to logging module (commit by [@pabllopf](#))
- [136ac6d](#) - refactor the math module to add the helper class. (commit by [@pabllopf](#))
- [0229c45](#) - diagram class of sln (commit by [@pabllopf](#))
- [c956ef4](#) - 2000 errors (commit by [@pabllopf](#))
- [871b912](#) - compile the original files (commit by [@pabllopf](#))
- [82cff54](#) - the folder names sln (commit by [@pabllopf](#))
- [32e9ade](#) - delete input module and updater module (commit by [@pabllopf](#))
- [0050d83](#) - delete some unit files and order folder of modules (commit by [@pabllopf](#))
- [e651f66](#) - obsolete code (commit by [@pabllopf](#))
- [4166706](#) - change base module (commit by [@pabllopf](#))
- [5923d59](#) - refactor contac class to extract enums definitions (commit by [@pabllopf](#))
- [153a203](#) - namespace on sln (commit by [@pabllopf](#))
- [43b41db](#) - debug mode with projects references (commit by [@pabllopf](#))
- [2284c27](#) - base module to new architecture (commit by [@pabllopf](#))
- [f2236d3](#) - dir and files name capitals (commit by [@pabllopf](#))
- [0941c0b](#) - delete temp files (commit by [@pabllopf](#))
- [8300398](#) - add new arquitecure with new names and folders (commit by [@pabllopf](#))
- [1f4880b](#) - smple rogue when run debug and release config (commit by [@pabllopf](#))

[v0.0.1](#) - 2022-07-13

🐛 Bug Fixes

- [027e2c3](#) - the version flow (commit by [@pabllopf](#))

Showcases

Config Reference

The `docfx.json` file indicates that the directory is the root of a docfx project.

⊗ IMPORTANT

All relative paths specified in config file are relative to the location of `docfx.json`

```
{
  "build": { },
  "metadata": { },
  "pdf": { }
}
```

Global properties

rules

Overrides default log message severity level. Key is the log code, supported values are `verbose`, `info`, `suggestion`, `warning`, `error`:

```
{
  "rules": {
    "InvalidHref": "info"
  }
}
```

build

Configuration options that are applied for `docfx build` command:

```
{
  "build": {
    "content": ["**/*.md|yml"],
    "resource": ["**/media/**"],
    "globalMetadata": {
      "_appTitle": "My App"
    }
  }
}
```

content

Specifies an array of content files to include in the project. Supports [File Mappings](#)

```
{
  "build": {
    "content": ["**/*.md","**/*.yml"]
  }
}
```

resource

Specifies an array of resource files to include in the project. Supports [File Mappings](#).

```
{
  "build": {
    "resource": ["**/*.png"]
  }
}
```

overwrite

Contains all the conceptual files that contain yaml headers with `uid` values and is intended to override the existing metadata `yaml` files. Supports [File Mappings](#).

globalMetadata

Contains metadata that will be applied to every file, in key-value pair format. For example, you can define `"_appTitle": "This is the title"` in this section, and when applying template `default`, it will be part of the page title as defined in the template.

```
{
  "build": {
    "globalMetadata": {
      "_appTitle": "DocFX website",
      "_enableSearch": "true"
    }
  }
}
```

See [Predefined Metadata](#) section for a list of predefined metadata.

fileMetadata

Specifies metadata associated with a particular file in order of metadata name, file [glob patterns](#) and metadata value:

```
{
  "build": {
    "fileMetadata": {
      "priority": {
        "**.md": 2.5,
        "spec/**/*.md": 3
      },
      "keywords": {
        "obj/docfx/**": ["API", "Reference"],
        "spec/**/*.md": ["Spec", "Conceptual"]
      },
      "_noindex": {
        "articles/**/*.md": true
      }
    }
  }
}
```

See [Predefined Metadata](#) section for a list of predefined metadata.

globalMetadataFiles

Set [globalMetadata](#) from external files.

```
{
  "build": {
    "globalMetadataFiles": ["global1.json", "global2.json"]
  }
}
```

fileMetadataFiles

Set [fileMetadata](#) from external files.

```
{
  "build": {
    "fileMetadataFiles": ["file1.json", "file2.json"],
  }
}
```

template

The templates applied to each file in the documentation. Specify a string or an array. The latter ones will override the former ones if the name of the file inside the template collides. If omitted, the embedded `default` template will be used.

Templates are used to transform YAML files generated by `docfx` to human-readable pages. A page can be a markdown file, an html file or a plain text file. Each YAML file will be transformed to one page and be exported to the output folder preserving its relative path to `src`. For example, if pages are in HTML format, a static website will be generated in the output folder.

```
{
  "build": {
    "template": "custom",
  }
}

{
  "build": {
    "template": ["default", "my-custom-template"],
  }
}
```

NOTE

Docfx provides several builtin has embedded templates: `default`, `default(zh-cn)`, `statictoc` and `common`. Please avoid using these as template folder name.

theme

The themes applied to the documentation. Theme is used to customize the styles generated by `template`. It can be a string or an array. The latter ones will override the former ones if the name of the file inside the template collides. If omitted, no theme will be applied, the default theme inside the template will be used.

Theme is to provide general styles for all the generated pages. Files inside a theme will be generally copied to the output folder. A typical usage is, after YAML files are transformed to HTML pages, well-designed CSS style files in a Theme can then overwrite the default styles defined in template, e.g. `main.css`.

xref

Specifies the urls of xrefmap used by content files. Currently, it supports following scheme: http, https, file.

exportRawModel

If set to true, data model to run template script will be extracted in `.raw.json` extension.

rawModelOutputFolder

Specifies the output folder for the raw model. If not set, the raw model will appear in the same folder as the output documentation.

exportViewModel

If set to true, data model to apply template will be extracted in `.view.json` extension.

viewModelOutputFolder

Specifies the output folder for the view model. If not set, the view model will appear in the same folder as the output documentation.

dryRun

If set to true, the template will not be applied to the documents. This option is always used with `--exportRawModel` or `--exportViewModel` so that only raw model files or view model files will be generated.

maxParallelism

Sets the max parallelism. Setting 0 (default) is the same as setting to the count of CPU cores.

markdownEngineProperties

Sets the parameters for the markdown engine, value is a JSON object.

For example. It can enable additional `FootNotes` markdig extensions with following settings.

```
{
  "build": {
    "markdownEngineProperties": {
      "markdigExtensions": [
        "FootNotes"
      ]
    }
  }
}
```

List of available built-in markdig extensions are available at [this URL](#).

customLinkResolver

Set the name of the `ICustomHrefGenerator` derived class.

groups

Specifies the output folder of specified group name.

```
"groups": {  
  "v1": {  
    "dest": "output_dir_v1"  
  }  
}
```

sitemap

Specifies the options for generating [sitemap.xml](#) file:

```
{  
  "build": {  
    "sitemap": {  
      "baseUrl": "https://dotnet.github.io/docfx",  
      "priority": 0.1,  
      "changefreq": "monthly",

    <priority>0.3</priority>
  </url>
  <url>
    <loc>https://dotnet.github.io/docfx/ReadMe.html</loc>
    <lastmod>2017-09-21T10:00:00.00+08:00</lastmod>
    <changefreq>monthly</changefreq>
    <priority>0.1</priority>
  </url>
</urlset>

```

baseUrl

Specifies the base url for the website to be published. It MUST begin with the protocol (such as http) and end with a trailing slash. For example, <https://dotnet.github.io/docfx/>. If the value is not specified, sitemap.xml will NOT be generated.

lastmod

Specifies the date of last modification of the file. If not specified, docfx automatically set the value to the time the file is built.

changefreq

Specifies the value of [changefreq](#) in sitemap.xml. Valid values are *always*, *hourly*, *daily*, *weekly*, *monthly*, *yearly*, *never*. If not specified, the default value is *daily*

priority

Specifies the value of [priority](#) in sitemap.xml. Valid values between *0.0* and *1.0*. If not specified, the default value is *0.5*

fileOptions

This property can be used when some specific files have different sitemap settings. It is a set of key-value pairs, where key is the [glob patterns](#) for input files, and value is the sitemap options. Order matters and the latter matching option overwrites the former ones.

disableGitFeatures

Disable fetching Git related information for articles. Set to `true` if fetching Git related information is slow for huge Git repositories. Default value is `false`.

metadata

Configuration options that are applied for `docfx metadata` command:

```
{
  "metadata": [
    {
      "src": [
        {
          "files": ["**/*.csproj"],
          "exclude": [ "**/bin/**", "**/obj/**" ],
          "src": "../src"
        }
      ],
      "dest": "api"
    }
  ]
}
```

src

Specifies the source projects using [File Mappings](#).

output

Specifies the output folder of the generated metadata files relative to `docfx.json` directory. The `docfx metadata --output <outdir>` command line argument overrides this value.

outputFormat

Specifies the generated output file format.

- `mref` (default): output as ManagedReference YAML files.
- `apiPage`: Output as ApiPage YAML files.
- `markdown`: Output as common-mark compliant markdown file.

dest

Specifies the output folder of the generated metadata files relative to `docfx.json` directory. The `docfx metadata --output <outdir>` command line argument prepends this value.

shouldSkipMarkup

If set to true, DocFX would not render triple-slash-comments in source code as markdown.

references

Specify additional assembly reference files. This settings is used when generating metadata from DLLs or source files. Solution or project file-based metadata generation does not use this property.

filter

Specifies the filter configuration file, please go to [How to filter out unwanted apis attributes](#) for more details.

disableDefaultFilter

Disables the default filter configuration file.

disableGitFeatures

Disables generation of view source links.

codeSourceBasePath

Specify the base directory that is used to resolve code source (e.g. `<code source="Example.cs">`).

properties

Specifies an optional set of MSBuild properties used when interpreting project files. These are the same properties that are passed to msbuild via the `/property:name=value` command line argument.

```
{
  "metadata": [
    {
      "properties": {
        "TargetFramework": "netstandard2.0"
      }
    }
  ]
}
```

NOTE

Make sure to specify "TargetFramework": <one of the frameworks> in your docfx.json when the project is targeting for multiple platforms.

noRestore

Do not run `dotnet restore` before building the projects.

categoryLayout

Specifies how categories in TOC are organized:

- `flattened` (default): Renders the namespaces as a plain label.
- `nested`: Renders the categories in a nested tree form.
- `none`: Don't render category labels.

NOTE

This setting is valid when using `apiPage` or `markdown` output format. `mref` format don't support categories.

namespaceLayout

Specifies how namespaces in TOC are organized:

- `flattened` (default): Renders namespaces as a single flat list.
- `nested`: Renders namespaces in a nested tree form.

memberLayout

Specifies how member pages are organized:

- `samePage` (default): Places members in the same page as their containing type.
- `separatePages`: Places members in separate pages.

allowCompilationErrors

When enabled, continues documentation generation in case of compilation errors.

enumSortOrder

Specifies how enum members are sorted:

- `alphabetic` (default): Sort enum members in alphabetic order.
- `declaringOrder`: Sort enum members in the order as they are declared in the source code.

`includePrivateMembers`

Specifies whether private or internal APIs are included in the generated docs. The default value is `false`.

`includeExplicitInterfaceImplementations`

Specifies whether explicit interface implementations are included in the generated docs. The default value is `false`.

`globalNamespaceId`

Specify the name to use for the global namespace. The default value is an empty string.

File Mappings

In the short-hand form, these filenames are resolved relative to the directory containing the `docfx.json` file:

```
{
  "build": {
    "content": ["**/*.md", "TOC.yml"]
  }
}
```

In the expanded form, the `files` are resolved relative to `src` directory, or the directory containing the `docfx.json` file in absence of the `src` property:

```
{
  "build": {
    "content": [
      {"files": "docs/**/*.md", "dest": "docs"},
      {"files": ["**/*.yml", "*.md"], "exclude": ["**/*Private*"], "src": "../api", "dest":
"api" }
    ]
  }
}
```

`files`

The file or file array, supports [glob patterns](#).

exclude

The files to be excluded, supports [glob patterns](#).

src

Specifies the source directory relative to the `docfx.json` directory, supports relative directory outside of the `docfx.json` directory such as `...`

dest

The folder name for the generated files.

Glob Patterns

- `*`: Matches 0 or more characters in a single path portion.
- `?`: Matches 1 character in a single path portion.
- `**`: Matches 0 or more directories and subdirectories.
- `{ }`: Expands the comma-delimited sections within the braces into a set.

Predefined Metadata

These are the standard metadata predefined by docfx. They are supported by builtin templates and SHOULD be supported by 3rd-party templates:

`_appTitle`

A string suffix appended to the title of every page.

`_appName`

The name of the site displayed after the logo.

`_appFooter`

The footer text. Shows Docfx's Copyright text if not specified.

`_appLogoPath`

Logo file's path from output root. Will show DocFX's logo if not specified. Remember to add file to resource.

`_appFaviconPath`

Favicon file's path from output root. Will show DocFX's favicon if not specified. Remember to add file to resource.

`_enableSearch`

Indicate whether to show the search box on the top of page.

`_enableNewTab`

Indicate whether to open a new tab when clicking an external link. (internal link always shows within the current tab)

`_disableNavbar`

Indicate whether to show the navigation bar on the top of page.

`_disableBreadcrumb`

Indicate whether to show breadcrumb on the top of page.

`_disableToc`

Indicate whether to show table of contents on the left of page.

`_disableAffix`

Indicate whether to show the affix bar on the right of page.

`_disableContribution`

Indicate whether to show the `View Source` and `Improve this Doc` buttons.

`_gitContribute`

Customize the `Improve this Doc` URL button for public contributors. Use `repo` to specify the contribution repository URL. Use `branch` to specify the contribution branch. Use `apiSpecFolder` to specify the folder for new overwrite files. If not set, the git URL and branch of the current git repository will be used.

`_gitUrlPattern`

Choose the URL pattern of the generated link for `View Source` and `Improve this Doc`. Supports `github` and `vso` currently. If not set, DocFX will try speculating the pattern from domain name of the git URL.

`_noindex`

File(s) specified are not returned in search results
